Brand Strategy

Our brand strategy guides Haworth's our visual and verbal identity. At the heart of the strategy is the brand idea: a simple, concise articulation of the essence of Haworth, capturing what we are and aspire to be.

What is a brand identity?

Brand identity expresses an essential idea at the heart of everything you do, unifying many forms of communication, and creating a coherent personality for many audiences.

Our brand strategy guides Haworth's visual identity. At the heart of the strategy is the brand idea: a simple, concise articulation of the essence of Haworth, capturing what we are and aspire to be.

The Brand Idea is expressed through visual and verbal brand identity touchpoints from design, photography, language, typography, media, and content.

Brand Idea:
What We Look Like

This Brand Idea is intended as an aspirational concept, but is not public facing. It should not appear as advertising copy or collateral for outside audiences.

Design Intelligence

The combination of aesthetic and creative intangibles with rigorous research and thinking is expressed through the dual nature of qualities always in interplay with one another.

These qualities can be dialed up or down depending on the context, audience, or business need. When combined, the words have a dual meaning that is greater than the sum of its parts.

Design is

- Creative
- Holistic
- Intuitive
- Considered

Intelligence is

- Actionable
- Insightful
- Clear
- Rigorous

Brand Attributes: What We Are Like

Across visual and verbal communications, interactions, and impressions, the following qualities embody Haworth's personality, expressed through our identity and voice.

Creative
Confident
Knowledgeable
Collaborative
Warm
Visionary
Dynamic
Insightful

Our Brand Architecture

Visual Identity

Our approach is **confident**, **simple**, and **open**: We use creativity and research to make design relevant, simplify the complex, and be inclusive. These guidelines help define the identity elements and how to use them—they're a set of tools, not a rigid system.

Our Brand Evolution

Our Mark in the World

The Haworth logotype and design have evolved organically over time, showing the shift from a furniture manufacturer to a premium solutions provider. Our logo stands out in the global landscape of commercial interiors. It communicates our stature as a leader in our industry and one of the largest privately owned furniture companies in the world.

1976

1988-2004

2004-2018

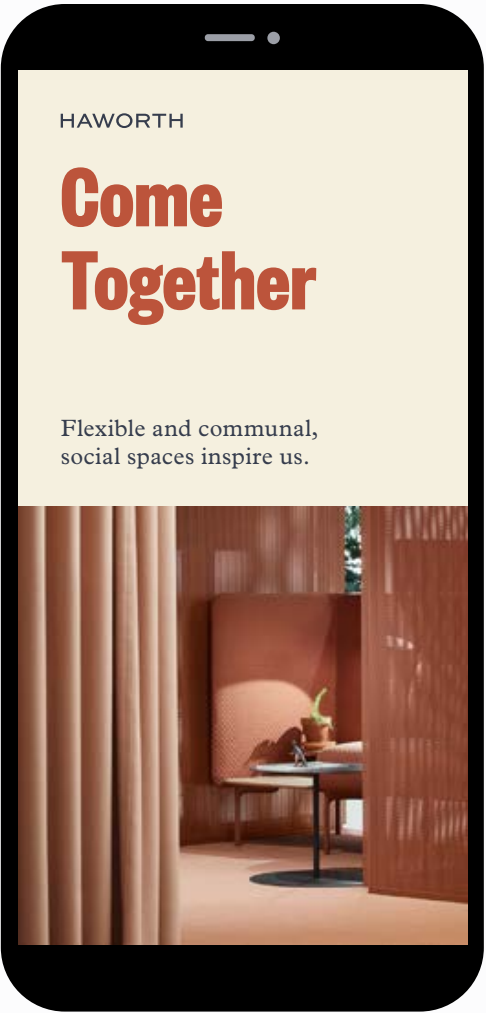

2019

More Than a Logo

Our visual identity is a dynamic language comprised of fonts, color palette, and visual strategies designed to help us connect with audiences in a clear, vibrant voice from print to digital.

Identity Elements

A Set Of Tools

Our visual identity includes core elements—logotype, color, and typography—to visually convey our brand and make Haworth recognizable and memorable across every application.

Logotype

Our Haworth logo is the primary frame of reference for our brand and the unifying element across all communications.

HAWORTH

Typography

Our typography pairs the sans-serif font family, Founders Grotesk with the serif typeface, Plantin, communicating modern design and heritage in combination with one another.

0123456789!?,;“”\$&#%(){}*

Plantin MT Pro Regular

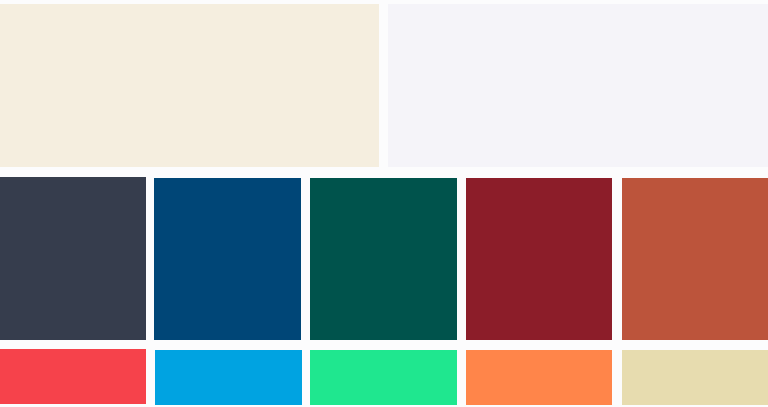

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

0123456789!?,;“”\$&#%(){}*

Color Palette

Our color palette is flexible and harmonious, taking our furniture palette in mind and pairing complementary dark and bright colors to allow photography and information to stand out.

Our Logo

Our Haworth logo is the primary frame of reference for our brand and the unifying element across all communications.

The wordmark evolved the previous logo to make it more legible across a range of applications and easier to use. It is based on mid-century letter forms with a geometric cut.

The result is confident and elegant, a nod to Haworth’s heritage with an eye to the future.

HAWORTH

Clearspace & Minimum Size

X is defined as the area around a logotype that excludes other graphics and typography. Allow for at least double the height (x) clearspace around all sides of the logotype.

Files will be provided of the standard logotype (12 pt) as well as the minimum size.

The majority of applications require the standard logo size, with stated exceptions where a minimize size logo is appropriate.

HAWORTH  1.764 mm minimum height

Trademark

A registered trademark (®) is used in conjunction with Haworth logo at least once within each application.

- How to Apply:
- First use or most prominent use unless cited in the footer
 - Same minimum height as the Haworth logotype
 - Not within text unless it’s the first and only instance of the registered logotype
 - Recommended placement: in footer with legal text at minimum height
 - When in doubt, err on the side of “over-marking”

HAWORTH®  1.764 mm minimum height

Placement & Margins

The logotype acts as a visual anchor and should always be placed toward the top and left-aligned in both print and digital applications.

Minimum margins are determined by the height of the logotype.

All margins should adhere to the (x) logic and apply appropriate usage (1x, 2x, 3x) depending on scale of the logotype.

Do Not Change the Logo!

Use the Haworth logotype correctly and consistently to maintain design integrity.

Here are examples of incorrect logotype usage.

Do not use drop shadows on the logotype

Do not cut off the logotype

Do not rotate, invert, spin, angle, or pivot the logotype

Do not stretch the logotype

Do not enclose the logotype in a shape

Do not type the logotype

Do not outline the logotype

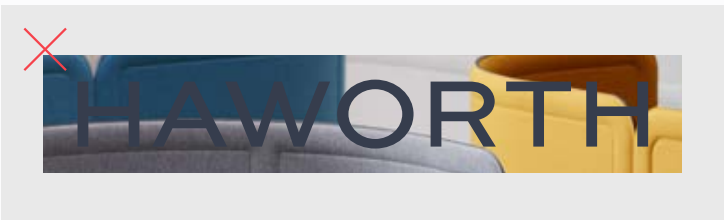

Do not fade into the background with type on top

Don't use more than one logo per visual surface

Do not use gradients in the logotype

Try to avoid a background that makes the logo illegible

Do not use colors outside of the Haworth palette

Sub-Brands

Sub-brands like Haworth Collection and Haworth Health emphasize the Haworth logo and do not require additional design for differentiation. For sub-brand, use the Haworth logotype followed by descriptors set in Plantin.

How to Apply:

- Use the standard and minimum size sub-brand logos provided
- Use only the horizontal lock-up at the minimum height
- Haworth is always the same height in the master brand and sub-brand logotype
- Haworth and the sub-brand descriptor always sit on the same baseline when horizontal
- Don't add a trademark symbol to the sub-brand logotypes
- When a trademark is needed use the recommended placement of the trademarked master brand logotype

Horizontal Lock-up (recommended lock-up)

Vertical Lock-up

Sub-Brands
with Trademark

Horizontal Lock-up (recommended lock-up)

Vertical Lock-up

Partnerships

Haworth, the dominant logo, is always on the left or the top with the partner logo on the right or bottom.

When permitted, neutralize the partner logo in Petrol Black.

Horizontal Lock-up

Vertical Lock-up

Preferred Dealer Logotype & Co-Branding

The Haworth Preferred Dealer logotype can be used in a horizontal or vertical lock-up.

- How to apply:
- Use Founders Grotesk Regular for the Preferred Dealer lock-up as it maintains Haworth as the master brand
 - Dealer logos are always on the left or top of the Haworth Preferred Dealer logo
 - Don't add a trademark symbol to the Preferred Dealer logotype
 - When a trademark is required, use the recommended placement of the trademarked master brand logotype

Horizontal Lock-up (recommended lock-up)

Haworth Preferred Dealer logotype is always the same width as the dealer's logotype.
Spacing between the logos (x) is the same height of the Haworth logo.

Vertical Lock-up

Haworth Preferred Dealer logotype is always half the height of the dealer's logo.
Spacing between the logos (x) is the same height of the Haworth logo.

Horizontal Lock-up

Vertical Lock-up

Primary Typefaces
(Licensed)

Haworth typography pairs a selection of the sans-serif font family, Founders Grotesk, with the serif typeface, Plantin.

Founders Grotesk

**Creative

Regular Italic	<i>ABCDEFGHIJKLMNOPQRSTUVWXYZ abcdefghijklmnopqrstuvwxyz 0123456789!?.;“”\$&#%(){}★</i>

Alternate Typefaces
(System Font)

Founders Grotesk and Plantin are the only licensed typefaces intended for use by the Haworth Creative Studio. In the few instances or use cases when they are not available, Franklin (in lieu of Founders Grotesk) used as an alternative for Microsoft Office applications, but their use will give the brand a generic look and feel.

- Do not mix default typography with Founders Grotesk and Plantin.
- Use Arial for all email communications.
- For Chinese characters use Ping Fang TC.
- Most PC users will only have Franklin Gothic Medium, which can have bold or italics applied.

Franklin Gothic

Our Color Palette is Designed For Harmony

Color provides a framework
to create expressiveness
and personalization across
communications.

Color Formula: Neutral + Dark + Bright

We use colors in the right proportions to create harmony.

The neutral color is a backdrop for and paired with complementary dark and bright colors.

This underlying principle provides general guidance for color usage and for more advanced applications.

* Colors in these guidelines are displayed in RGB. Use CMYK formulas for digital printing and PMS formulas for offset printing.

Core Colors: Essentially Haworth

Neutral Cream/Gray, Petrol Black, and Bright Red are our core colors and represent our brand consistently across applications. They are a foundation for color our Neutral + Dark + Bright formula. Use core colors in corporate applications.

- How to Apply:
- Choose one Neutral color for the background
 - Put copy in Petrol Black
 - Use Bright Red as an accent (e.g., logo or small callout); note that it's also used for the business card background

Neutral (choose 1)

Cream Tint

Gray Tint

Dark

Petrol Black

Bright

Bright Red

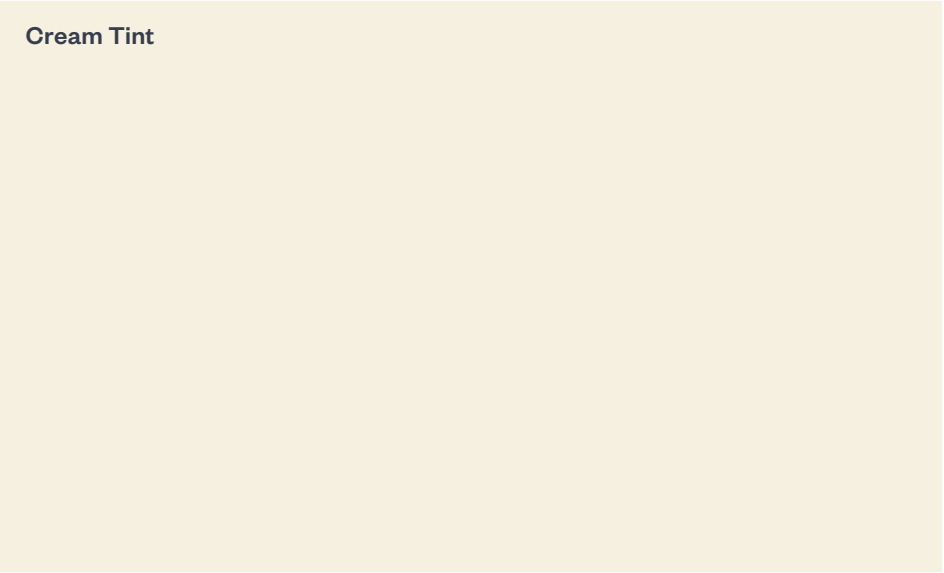

Standard Colors

We use Standard Color for applications where the content and subject are our products or activities or when the logo appears with photography or illustration.

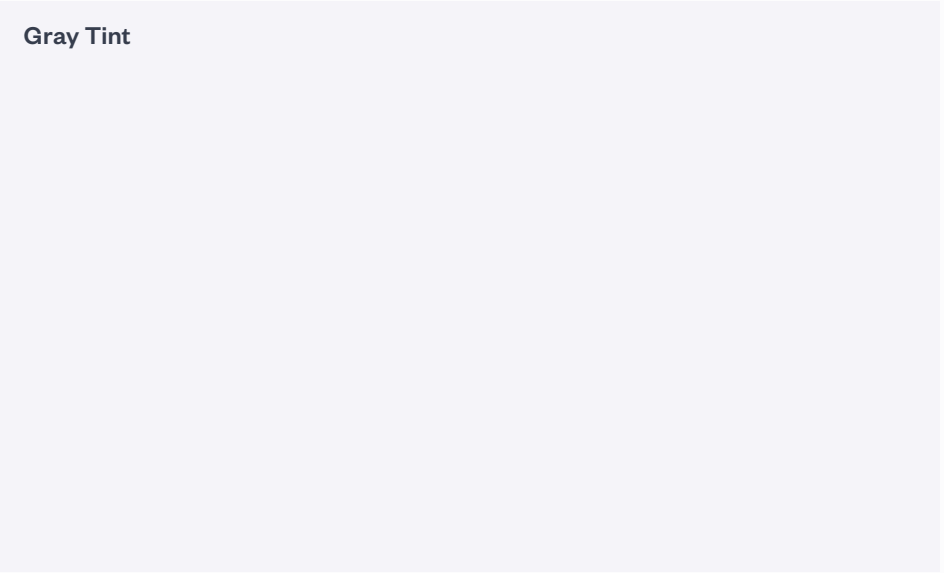

- How to Apply:
- Use Petrol Black and one Neutral as background or copy color
 - Use bright colors in moderation as accents (small callouts or infographics)

Neutral
(choose 1)

Cream Tint

Gray Tint

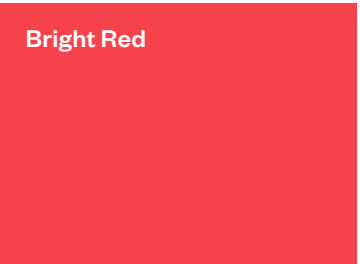

Dark

Petrol Black

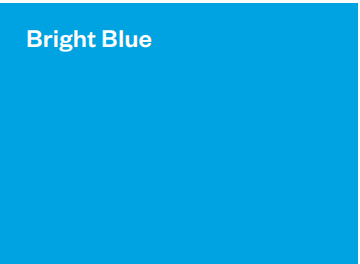

Bright
(choose 1)

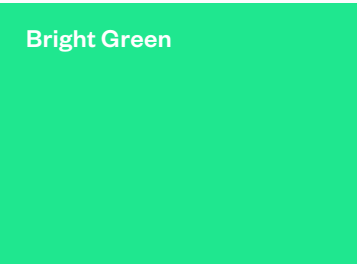

Bright Red

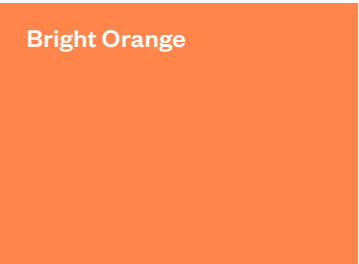

Bright Blue

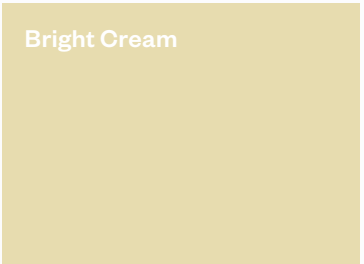

Bright Green

Bright Orange

Bright Cream

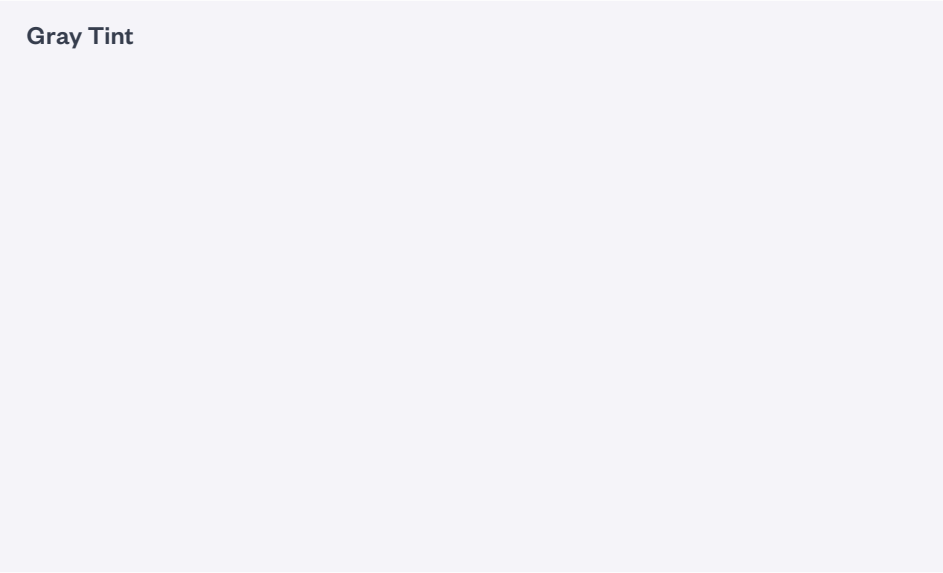

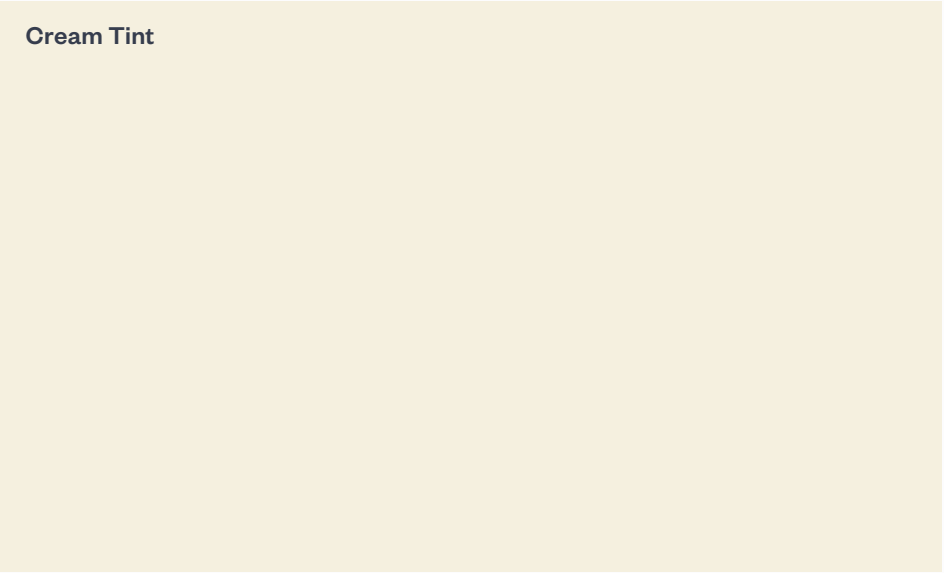

Expressive Colors

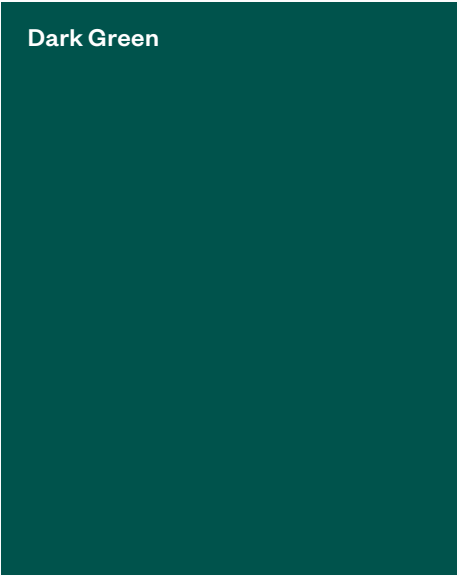

We use expressive colors for more external facing applications that require expression in their identity, from social media to events. Follow the Neutral + Dark + Bright color formula.

- How to Apply:
- Use one Dark color and one Bright color for either background or copy
 - Use Neutral colors as accents
 - Do not mix two Bright colors
 - Maintain the formula of one Neutral + one Bright + one Dark
 - If necessary, you can use Petrol Black as a second Dark color

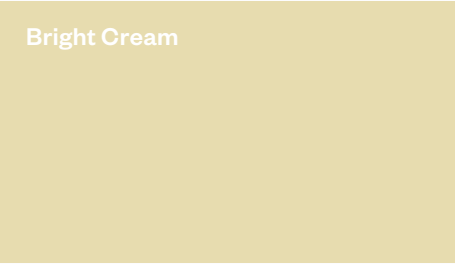

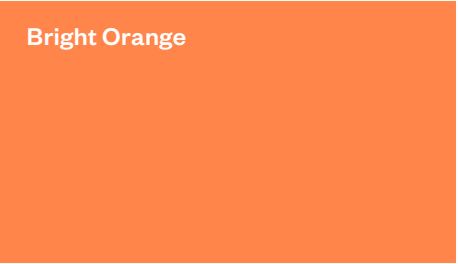

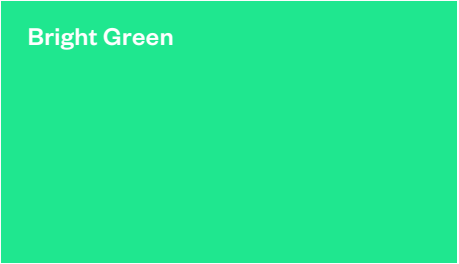

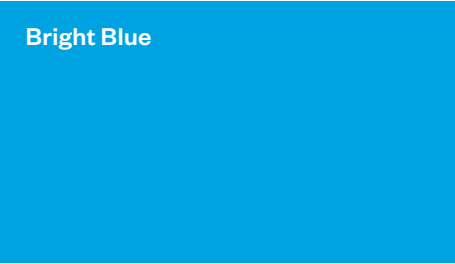

Neutral
(choose 1)

Dark
(choose 1)

Bright
(choose 1)

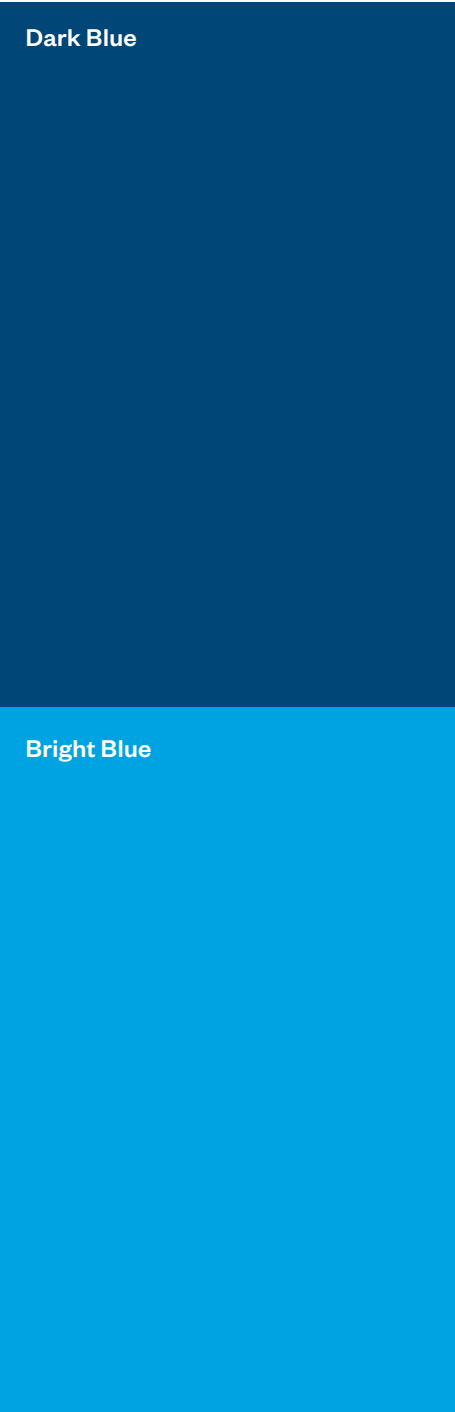

Expressive Colors: Recommended Color Combinations

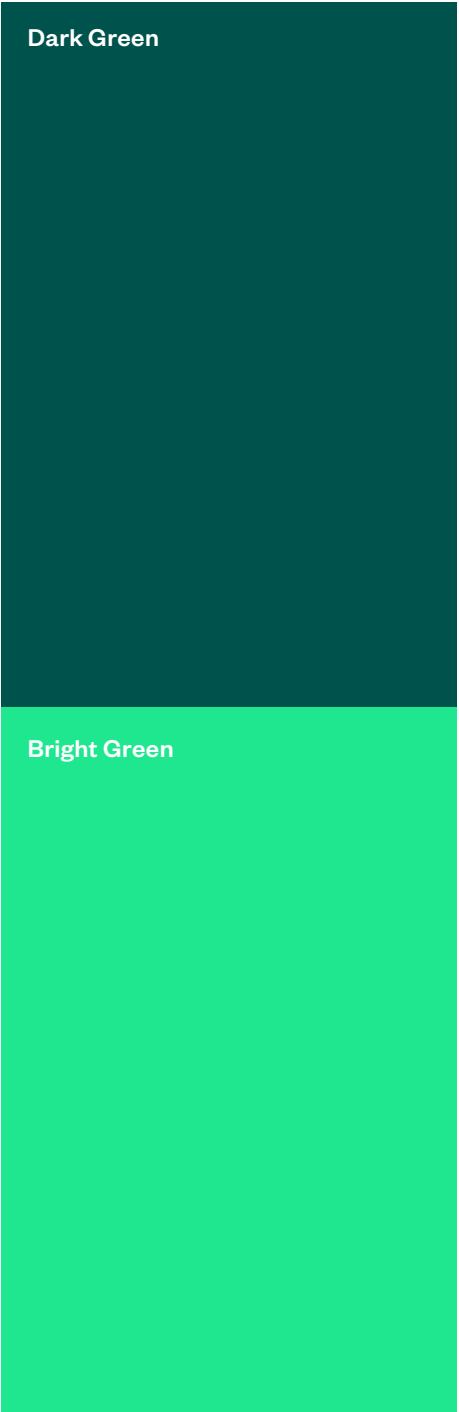

Recommended Usage:

- These combinations can be paired with any Neutral color
- Other combinations are possible but be mindful of text legibility

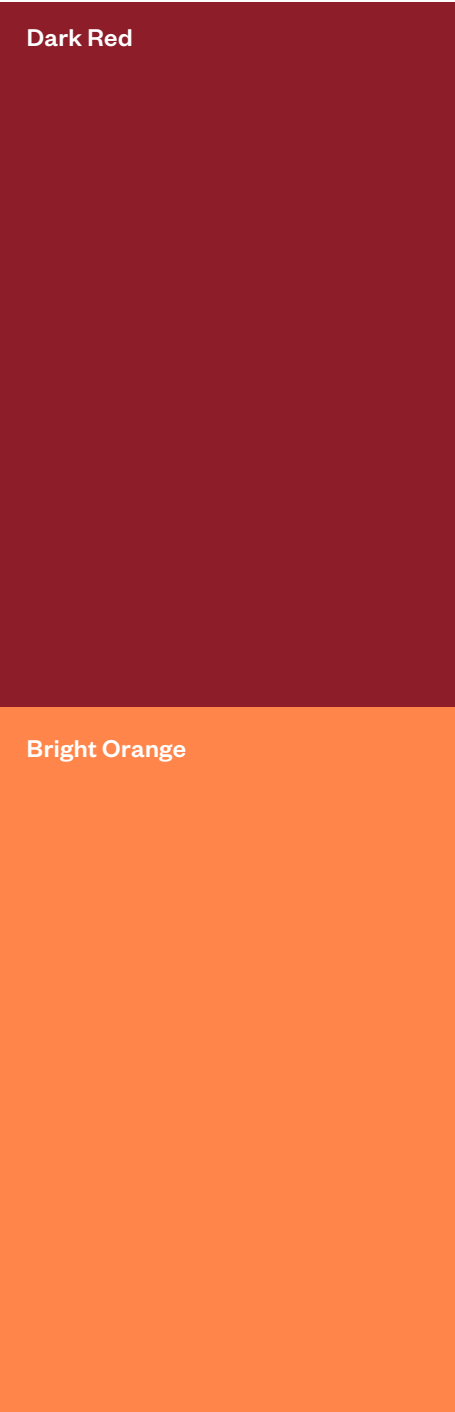

Combination 1

Combination 2

Combination 3

Combination 4

Logo Color Usage

Depending on context, the Haworth logo may require different color usage—from corporate to more expressive: Bright Red, Petrol Black, and specific color combinations, based on application.

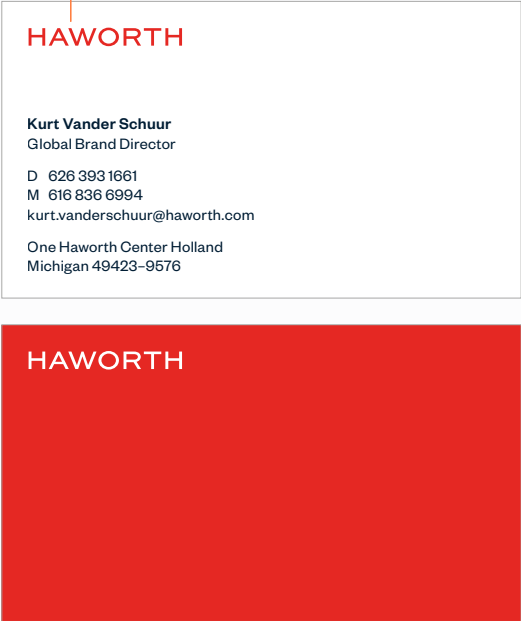

Corporate (signature pieces, heritage)

The red logo is used in corporate communication where the main content is information about Haworth.

Sample applications:

- Business cards
- Stationery
- ID badge, name badge

Corporate Color

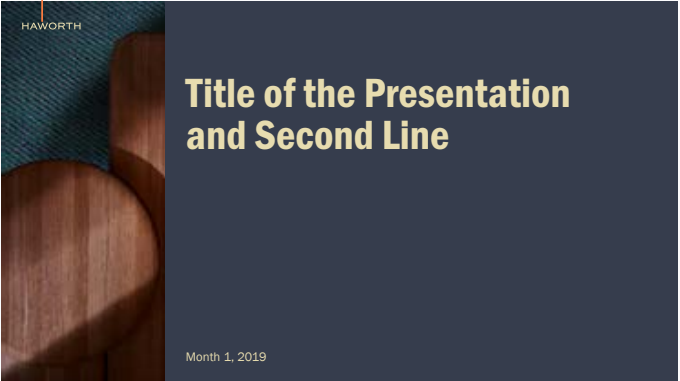

Standard (large majority of uses)

The Petrol Black or knock-out neutral logo is used when the content and subject are products or activities or when the logo appears with photography or illustration.

Sample applications:

- Marketing collateral
- Presentations
- White papers, case studies
- Website

Standard Color

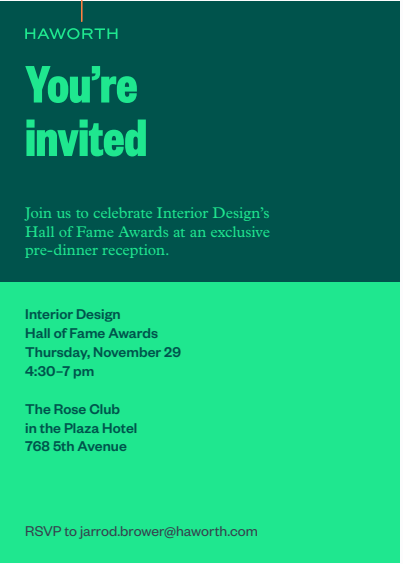

Expressive (specific applications)

The expressive logo is applied in special cases where items require more flexibility and expression in their identity. Any color in the Haworth palette can be selectively applied to the logo.

Sample applications:

- Fairs and special events
- Social media

Expressive Color

Color Don'ts

Work within the defined color palette to create a distinct branded experience. These examples illustrate how not to apply color in composition and application.

Don't use Bright Red outside of corporate applications

Don't use non-brand colors

Don't be too loud or use multiple Bright colors in one composition

Don't use transparency

Don't use gradients

Make sure there is enough contrast to guarantee legibility with typography

System

Now that all the design elements have been introduced, here's how you can create communications for Haworth. In these pages you will learn how these elements—logotypes, typography, and color—work together in layouts.

Layout Sizes (United States)

We use a unified system, based on a letter format (8.5 x 11 inches).

Print formats are shown at 30% scale.

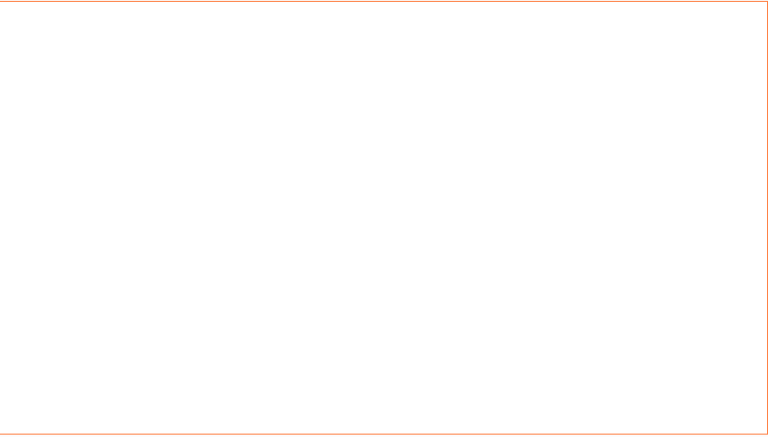

Use a 16:9 aspect ratio for digital presentations.

Print
Letter, 8.5 x 11 in

Print
Tabloid, 17 x 11 in

Digital
Widescreen: 16:9 aspect ratio
PowerPoint Presentation: 960 x 540 px
Hi-Res Digital Presentation: 1920 x 1080 px

Layout Sizes (International)

For Europe and Asia Pacific we use the international ISO Standard system, based on the A Series. A4 designs correspond to letter and A3 designs correspond to tabloid.

Print formats are shown at 30% scale.

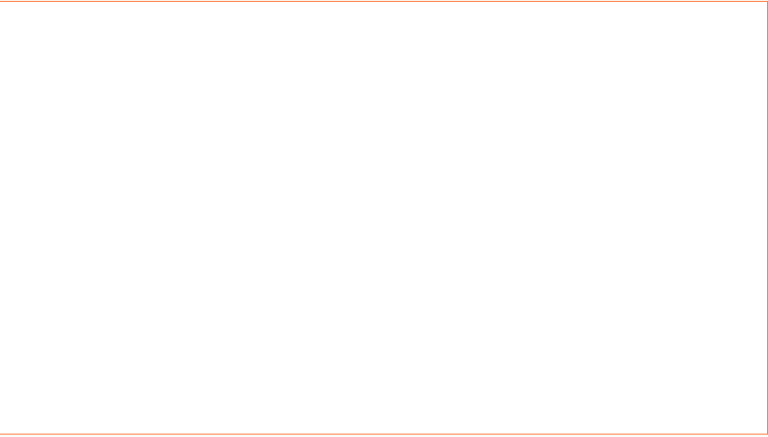

Use a 16:9 aspect ratio for digital presentations.

Print
A4, 210 x 297 mm

Print
A3, 420 x 297 mm

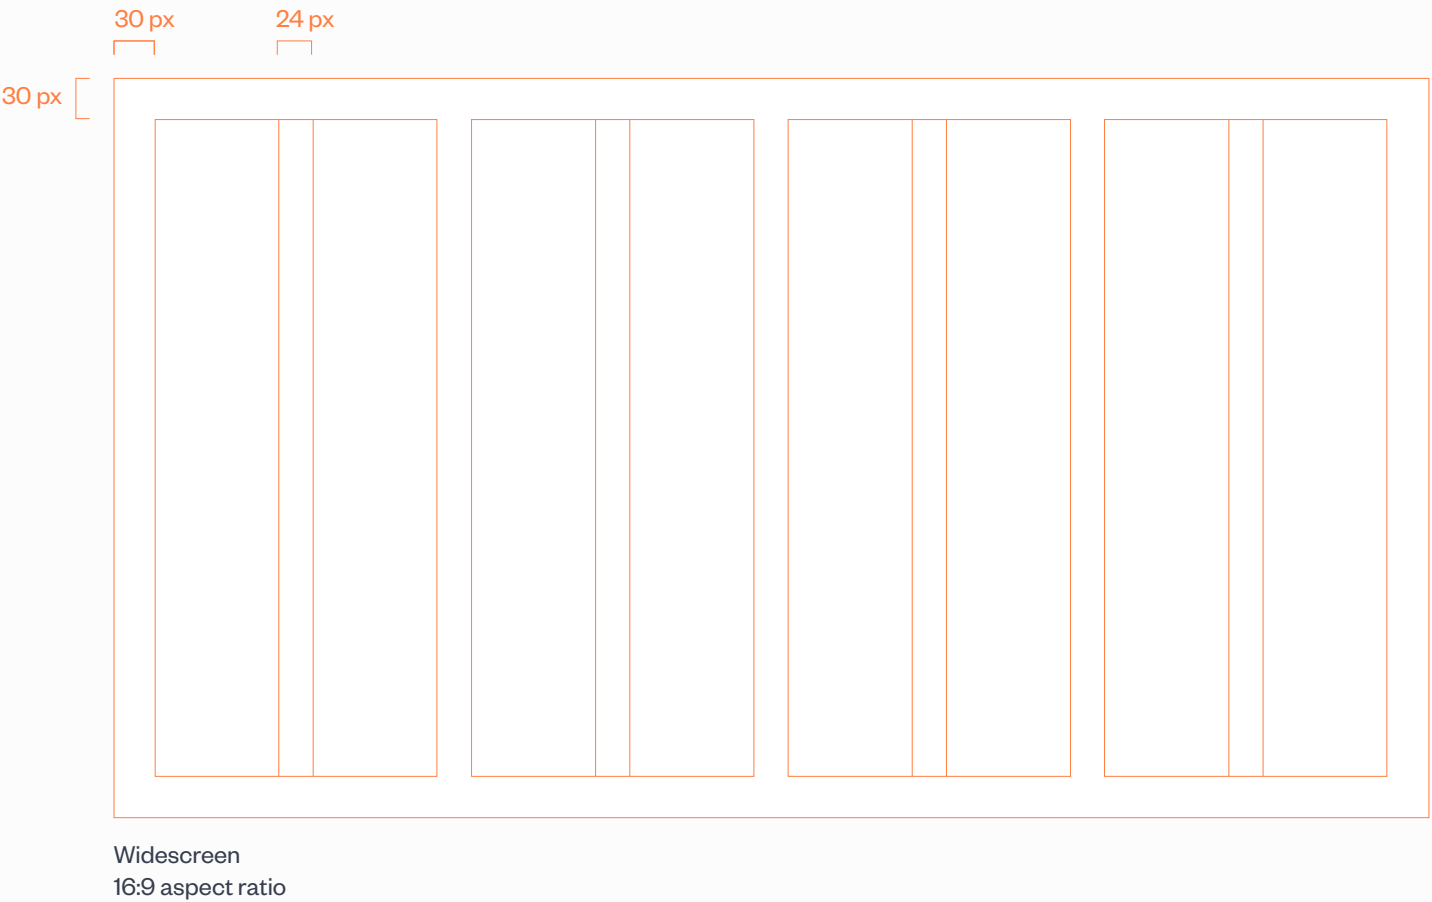

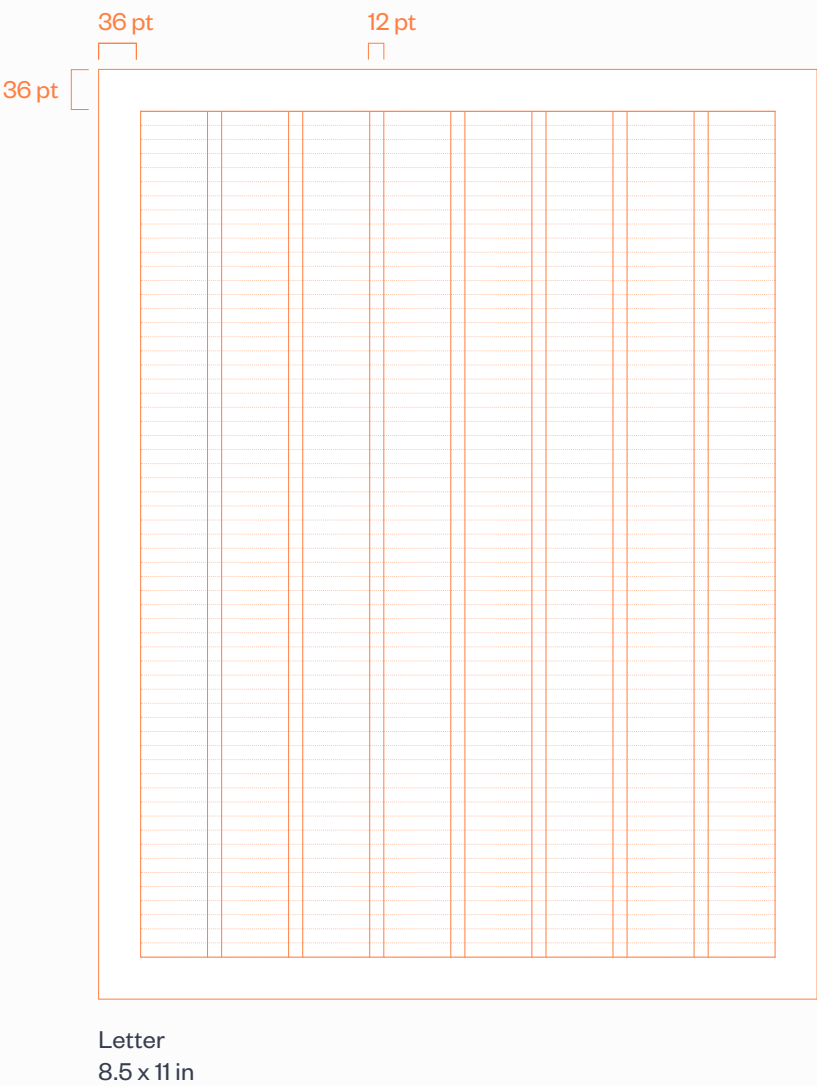

Digital
Widescreen: 16:9 aspect ratio
PowerPoint Presentation: 960 x 540 px
Hi-Res Digital Presentation: 1920 x 1080 px

Grid Systems

Using a grid ensures that layouts are constructed in a clean and organized fashion. The grid helps us apply structure to information and helps guide the way people read our communication material.

All printed grids are built on a **12 pt baseline grid** system, allowing for maximum flexibility in column structure. The grid can be adapted to any format—vertical or horizontal. Use a continuous even margin based on 12 pt increments (12 pt, 24 pt, 36 pt, 48 pt, etc.).

For digital presentations the size is based on the default PPT slide 960 x 540 px, the margins are set at 30px (3 times the height of the logo at 10 px).

Modular Layout (Portrait Format)

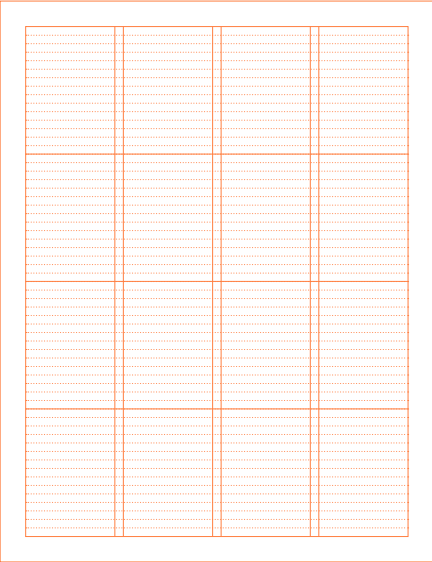

Our modular system is based on dividing the page in fourths.

- Four columns have a gutter of 12 pt (based on the 12 pt baseline grid)
- Horizontal guides are defined by dividing space inside the margins in fourths, and these guides sit on the baseline grid
- Compositions are created by placing content inside the modular fourths

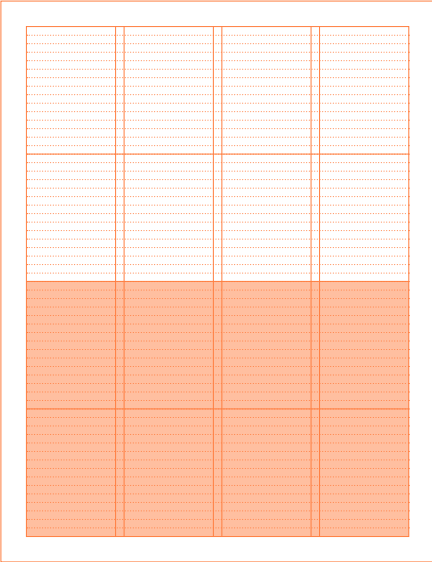

Recommended modular layouts are half-half and 1 to 3.

- More expressive applications (color or images are full bleed), a half-half module is recommended
- For full bleed applications margins are adjusted inside both halves to maintain consistent internal margin of 36pt

Examples are shown in letter format (8.5x 11 in).

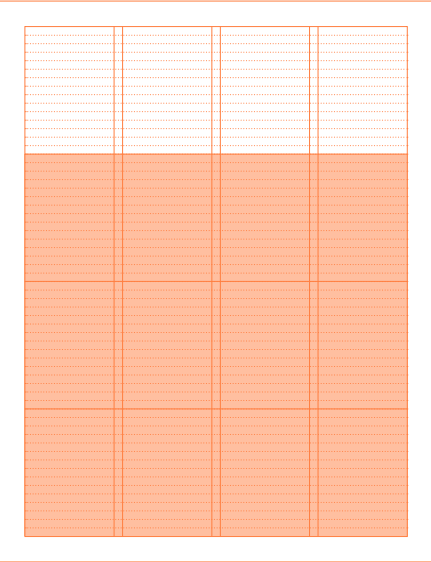

Modular fourths, with margins

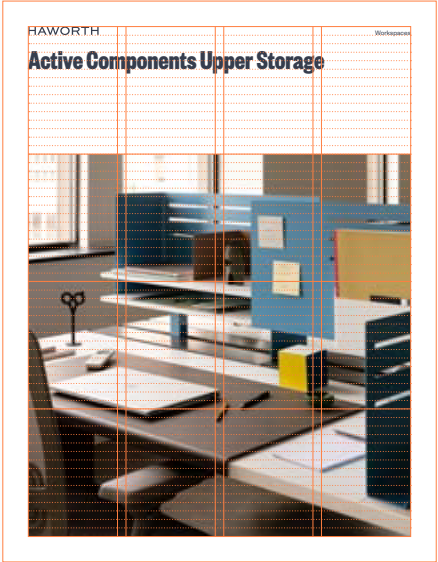

Half-half, with margins

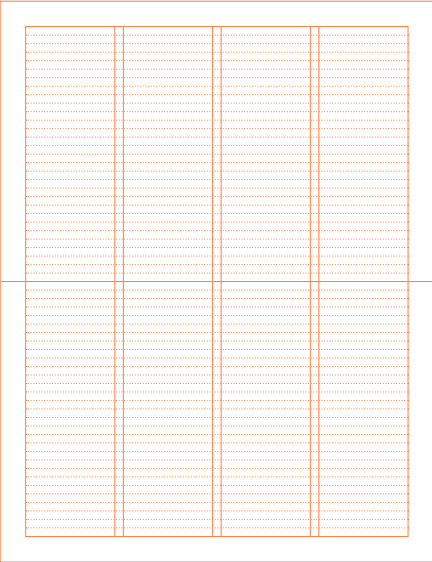

Sample layout

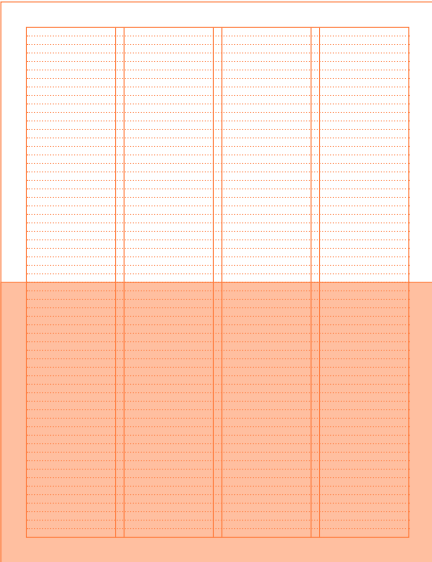

1 to 3, with margins

Sample layout

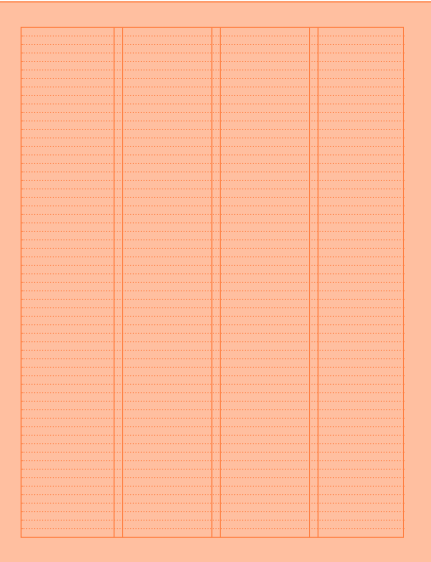

Modular half, full bleed

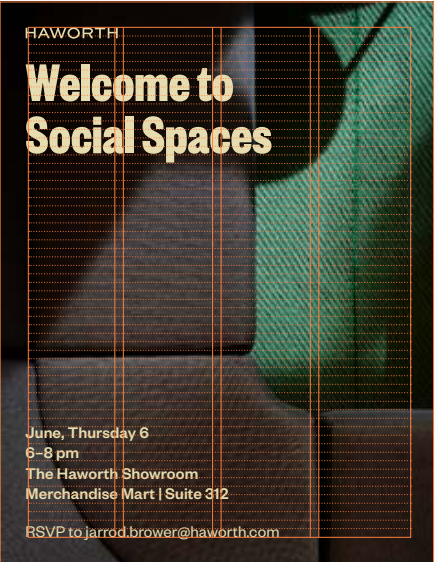

Half-half bleed color or image background

Sample layout

Full bleed color or image background

Sample layout

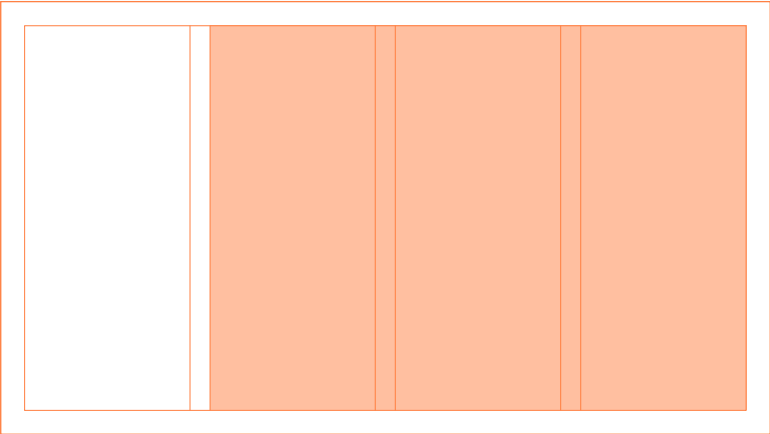

Modular Layout (Digital Landscape Format)

Our modular system is based on dividing the page in fourths.

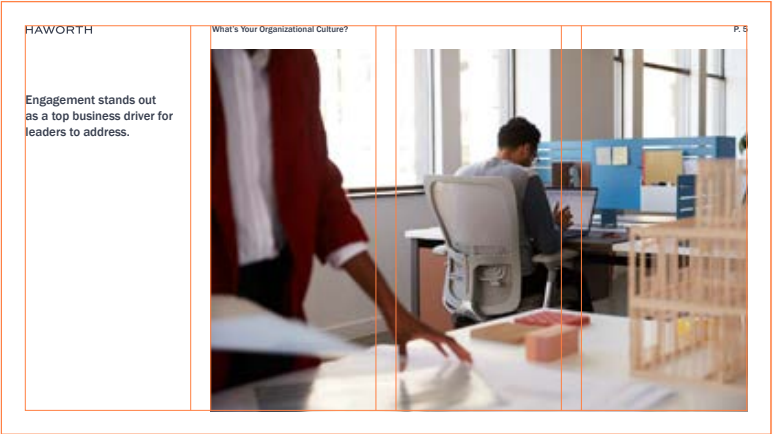

The four column grid is also applied to digital presentations developed Haworth Creative Studio.

- Standard PowerPoint slide: the four columns have a gutter of 24px, in set margins of 30px
- Recommended modular layout is 1 to 3
- Same grid can be used with full bleed content (color or images)

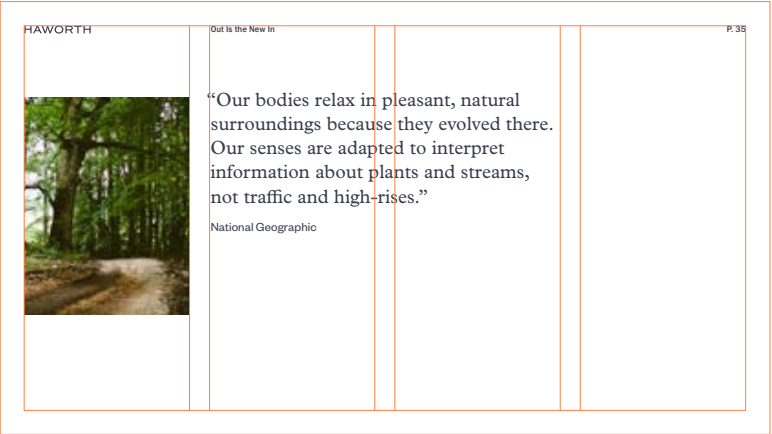

Examples are shown in widescreen, 16:9 ratio.

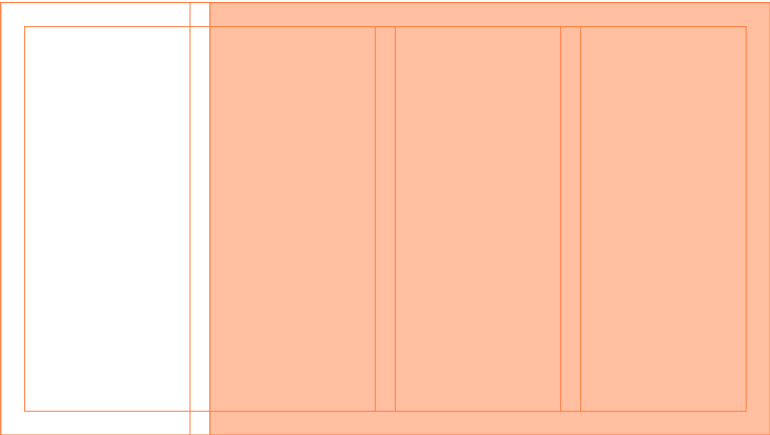

1 to 3, with margins

Typography

Prioritizes Messaging

Typographic variations built into the use of multiple typefaces and styles define the brand look and feel.

- How to Apply:
- Typographic hierarchy is based on a 12 pt grid
 - With larger type sizes, scale type by increments of 12 pt to maintain a proportional text hierarchy
 - Existing sizes are related to letter format (8.5 x 11 in)
 - For larger documents the relationships should be scaled

Founders Grotesk Bold XCnd Reserved for the most important item on the page. Maximum 24 characters per line composed in maximum two lines.
Founders Grotesk Headline 40 pt Leading 36 pt
Founders Grotesk Medium For titles in publications, brochures, i.e customer story. Maximum 24 characters per line.
Founders Grotesk Large Title 22 pt Leading 24 pt
Founders Grotesk Medium For titles within copy, e.g., white paper. Maximum 30 characters in a maximum of 1 line.
Founders Grotesk Medium Title 15 pt Leading 18 pt
Founders Grotesk Regular For technical body copy and information e.g. dates, time.
Founders Grotesk Standard Text 10 pt Leading 12 pt
Founders Grotesk Regular For captions, texts in diagrams, running titles, and short supportive copy.
Founders Grotesk Subtext 8 pt Leading 10 pt

Plantin MT Pro is not used for headlines.
Plantin MT Pro Regular For emphasis on messaging. Maximum 24 characters per line. Two line max.
Plantin Large Text 24 pt Leading 30 pt
Plantin MT Pro Regular For pull quotes and quotes within copy, and short paragraphs not spanning more than one page.
Plantin Medium Text 14 pt Leading 18 pt
Plantin MT Pro Regular For body copy in messaging or long copy blocks spanning multiple pages.
Plantin Standard Text 9.65 pt Leading 12 pt
Plantin MT Pro is not used for captions and subheads

Letter Spacing

Letter spacing or tracking should typically be set to its default (0). However, when fine-tuning text up to -10 and 10 units of tracking are allowed. Never add additional tracking to Founders Grotesk or Plantin outside of the -10 and 10 bracket.

Designing the Workplace for Innovation

11

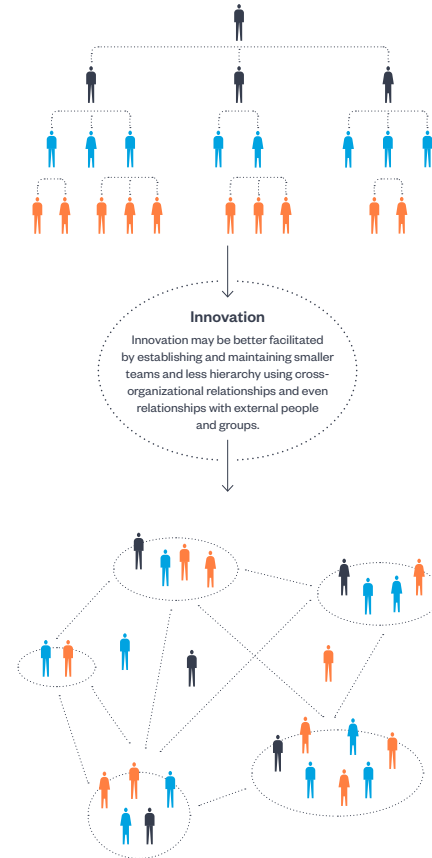

- Putting It All Together:
Organizational Implications

All organizations need to innovate. Organizational culture is as important as addressing our needs through intelligent workplace design to help optimal creative performance. By coordinating our collective creative efforts, structural and social norms of organizational culture⁶² set the stage for innovation. For collective creativity, groups should encourage respectful engagement,⁶³ diversity in knowledge and perspectives, expectation of frequent failures, and an understanding that high-pressure timelines can block creativity.⁶⁴

These may be better facilitated in organizations (or parts of an organization) that have less hierarchy. We see some of these qualities arise within coworking environments⁶⁵—environments that seem to be innovation factories. Based on what we know about individual creativity, group creativity, and innovation, this means establishing and maintaining smaller teams and less hierarchy using cross-organizational relationships and even relationships with external people and groups. Innovation is better supported by establishing and maintaining smaller teams and less hierarchy through relationships across an organization and with external people and groups. One of the hallmarks of creativity is creating a network structure allowing for weak and strong ties: access to diverse knowledge to create ideas (weak ties) and ability to bring those ideas to fruition (strong ties).⁶⁶ Team members should be encouraged to span boundaries to internal members of other groups, and external members⁶⁷ at different points of the creative process.

Innovation is better supported by establishing and maintaining smaller teams and less hierarchy through relationships across an organization and with external people and groups.

An organization's workplace communicates an organization's values and culture.⁶⁸ To encourage innovation and creative work, design solutions should anticipate our individual and group creative rhythm needs, protecting focus work, and encouraging restorative activities. Employees are happier when they can focus on their work and their workplace expresses they are valued by their organization.⁶⁹ With the right environments and tools for creative rhythm, we can all be best supported to do what we need to create and innovate.

Hall of Fame Awards

Thursday, November 29
4:30–7 pm

The Rose Club
in the Plaza Hotel
768 5th Avenue

Join us to celebrate Interior Design’s Hall of Fame Awards at an exclusive pre-dinner reception.

- Do
- Use type to emphasize
 - Be concise
 - Use title case for headlines, without punctuation
 - The larger the type size, the shorter the copy
 - Stack type rather than forcing it into one line
 - Apply callout treatments sparingly to headlines
 - Use quotations as pull quotes or introduced within the context of body copy

HAWORTH

You are invited to the Interior Design Hall of Fame Awards Pre-Dinner.

Join us to celebrate Interior Design’s Hall of Fame Awards at an exclusive pre-dinner reception.

Thursday, November 29 at 4:30–7 pm
The Rose Club in the Plaza Hotel, 768 5th Avenue

- Don’t
- Never add a period or an exclamation point to a headline
 - Never use all caps
 - No floating quotations
 - Don’t overemphasize everything—this feels too “shouty”
 - If what you’re trying to say is too long, maybe it should be a caption or body copy and not a headline
 - Avoid underlining text in all applications unless the text is a digital hyperlink

Art Direction

Photography humanizes the deep research that goes into our understanding of how people use space, and brings product to life in an aspirational way by showing how it fits into lives and spaces. The following guidelines explain the principles behind this approach and give visual inspiration.

Photography elevates the brand

Natural

- Light changes the mood and light conditions reflect human presence (shadows, variation).
- Use natural light as much as possible.
- If natural light is not possible, use soft lighting (e.g., a softbox).

Authentic

- Use spaces and people we aspire to.
- Work with photography partners that demonstrate quality work.
- Avoid overly retouched or staged images.

Balanced

- Spaces and furniture are essential and reduced.
- Reduce clutter and complexity.

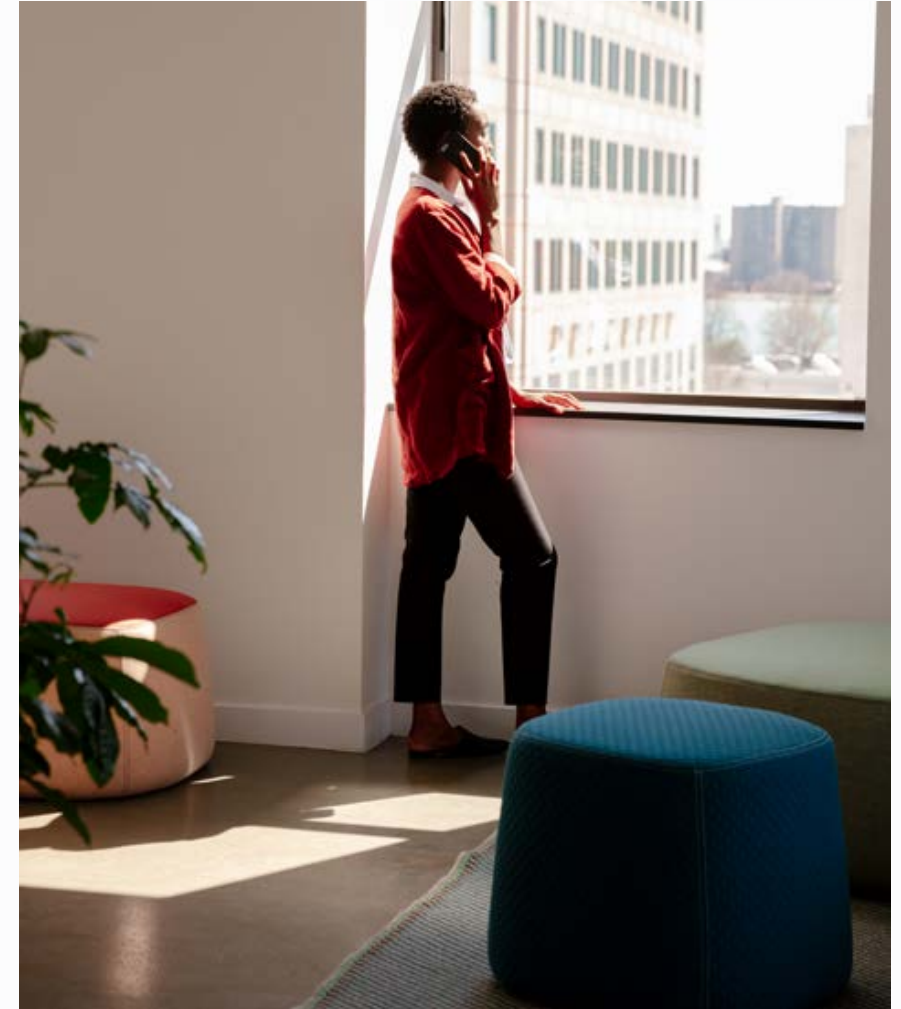

Spaces

- Respect natural colors and textures
- Avoid distorted lenses and forced angles
- Frontal views are usually the most flattering to spaces
- Avoid overheads unless trying to show an entire space

People

- Steal the moment (vs posing)
- Always cast people who can be used in videos and not just still imagery
- Approach photo shoots in the same way as if you are shooting a film, considering the framing and narrative of each shot
- Make people look relaxed
- Emphasize people as focal point vs. product (documenting something for a specific content purpose)

Product: Narrative

- Play with composition using foreground and background
- Don't over-stress the depth of field
- Shoot at eye level
- Show details that give you a sense of the materiality

Product: White Sweep

Drop shadows show dimensionality but need to be used minimally. Below are guidelines for preferred style and attributes.

- Center product within the frame
- Shoot essential angles: front, back, 90° side
- 45° angle is used to show features that are not visible in the essential angles
- Use even lighting
- Avoid drop shadows, when possible, silhouette the product
- Don't cast shadows on product
- Background is white with no visible horizon line

Don'ts

Avoid the following points when creating and selecting images.

Avoid artificial propping

Don't use filters

Avoid staged and posed situations

Don't over stress the depth of field

Avoid distorted lens

Avoid artificial light

Don't force the angle

Don't shoot people as motion blurs

Selecting Imagery from Sub-Brands and Partners

When selecting imagery from other Haworth sub-brands and partners look for natural light, authenticity, and a graphic composition. Review our guidelines on spaces, people, and product for more details on what makes a good photo.

Examples shown from Haworth sub-brands.

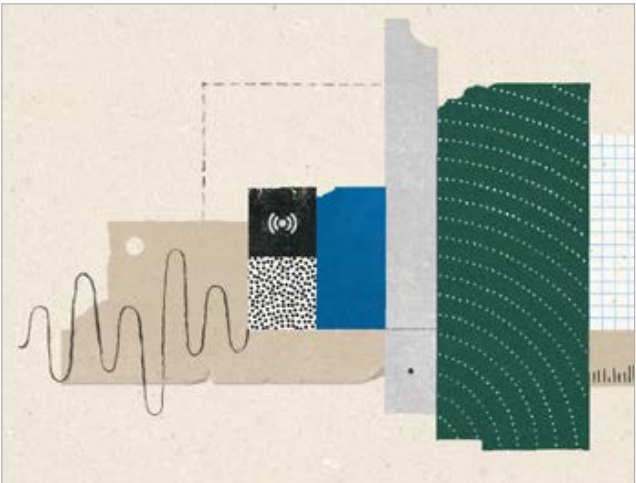

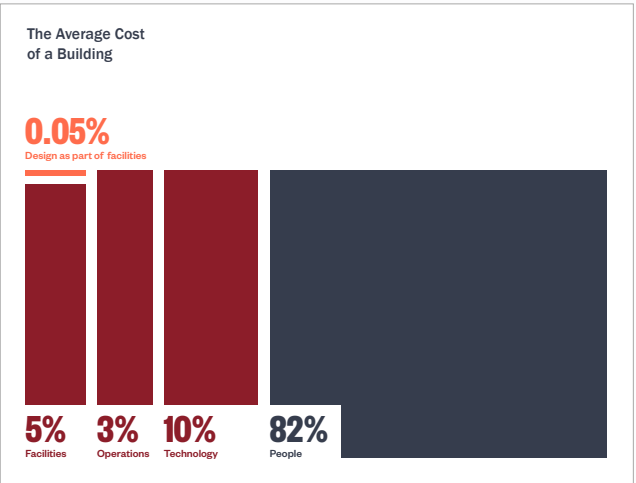

Align Your Message with the Right Style

Illustrations range from informational (telling a story or specific point) to abstract (setting a mood, standing in for a concept). Some styles can be executed in-house while others may be commissioned to external illustrators to develop our illustration library.

Informational

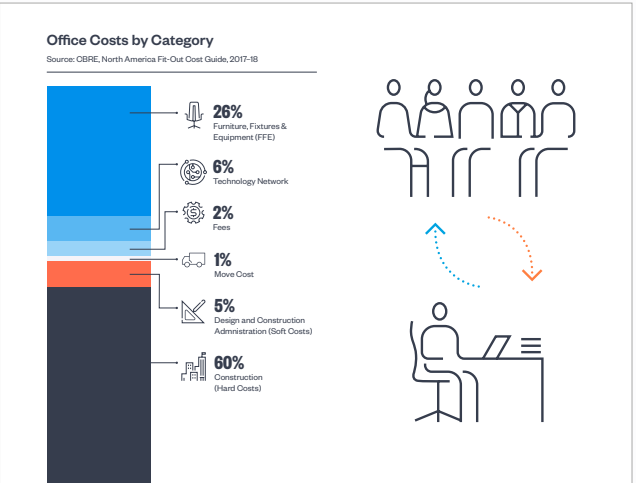

Abstract

Matthew Hancock

Noémie Cédille

Jonathan Calugi

Noémie Cédille

Infographics: diagrams, icons

- Provides visual support in documents, publications, digital presentations
- Based on icon compositions and developed by Haworth Creative Studio

Sketch: textured, line art

- Visualizes our design services for customers' projects and spaces
- Based on template, it can be consistently applied by the Haworth interior design team

Narrative: collage, line art

- To be commissioned for campaigns or event communication
- Recommended as a collaboration with multiple illustrators

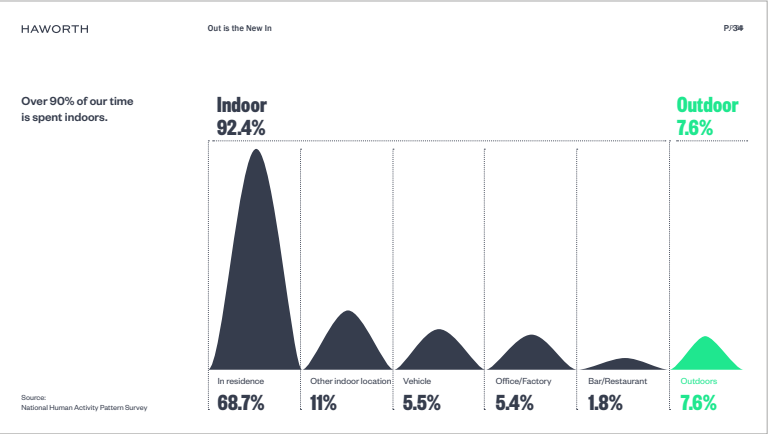

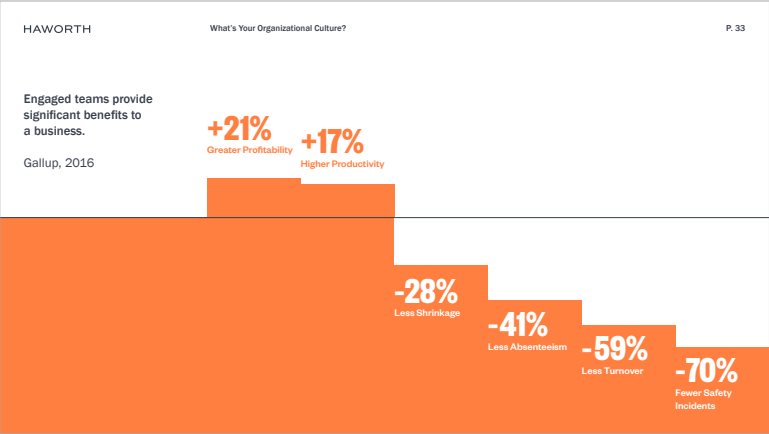

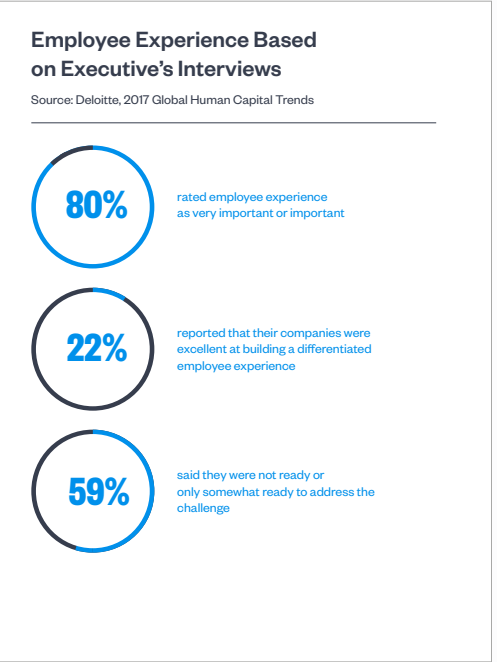

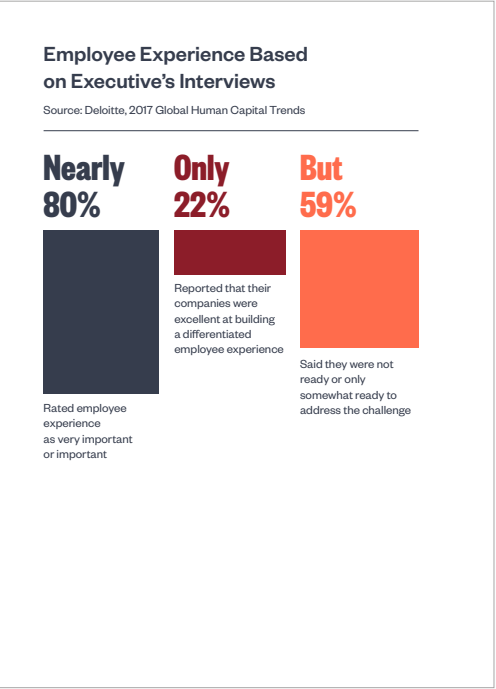

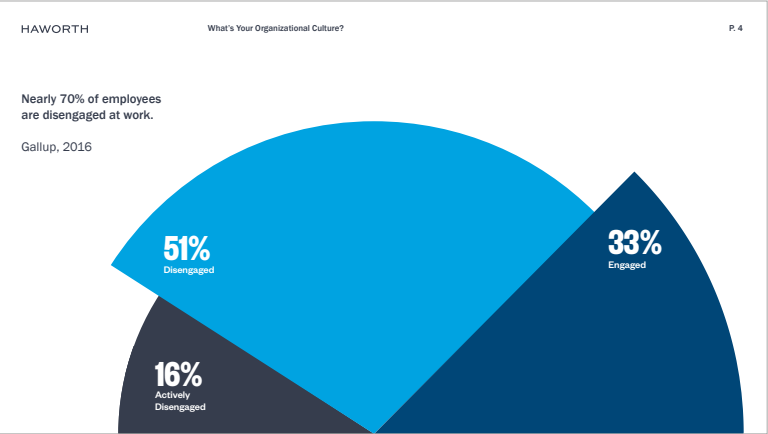

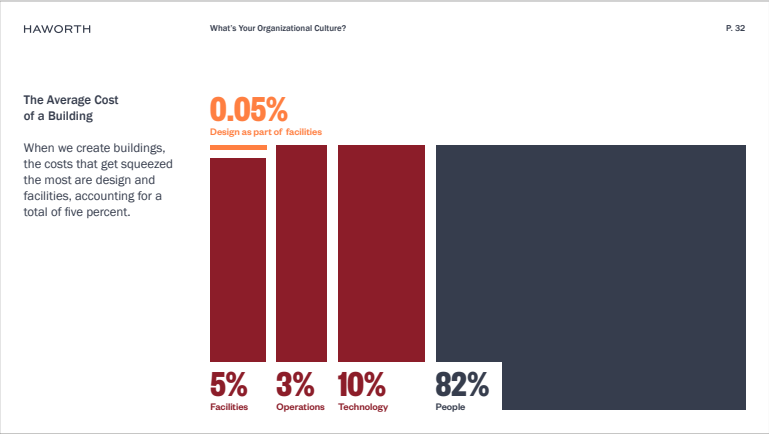

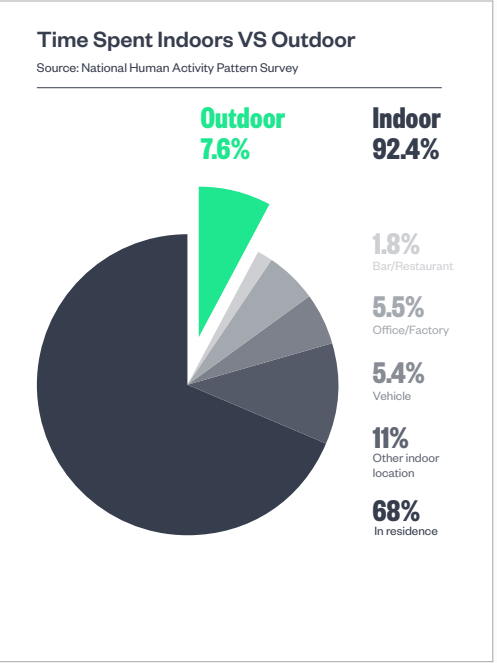

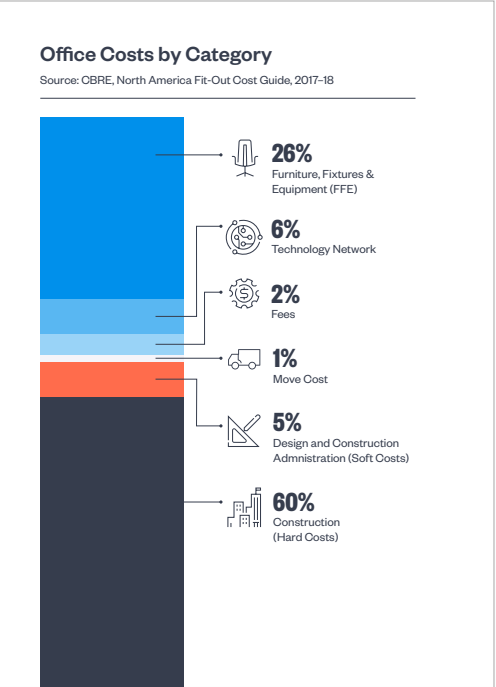

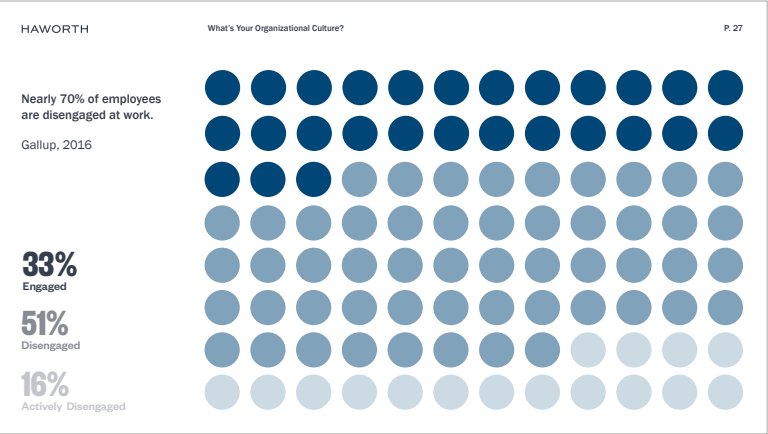

Abstract

- For invites or more expressive applications when content related illustration or photography is not available

Infographics

Infographics are visual representations of information that use bold messaging and graphics to create confident compositions by using the entire page and mix of muted and accent colors.

- Use well-made infographics at a large scale
- Use in documents, publications and digital presentations as visual support
- Don't use as a stand alone illustration or to communicate a campaign or event
- Based on icon compositions and developed by Haworth Creative Studio

Sketch

Sketch is an approach to representing spaces. This style adds collage techniques with a hand-drawn look. An alternative approach is to use a precise, in-perspective line art style that maintains size and construction details true to reality.

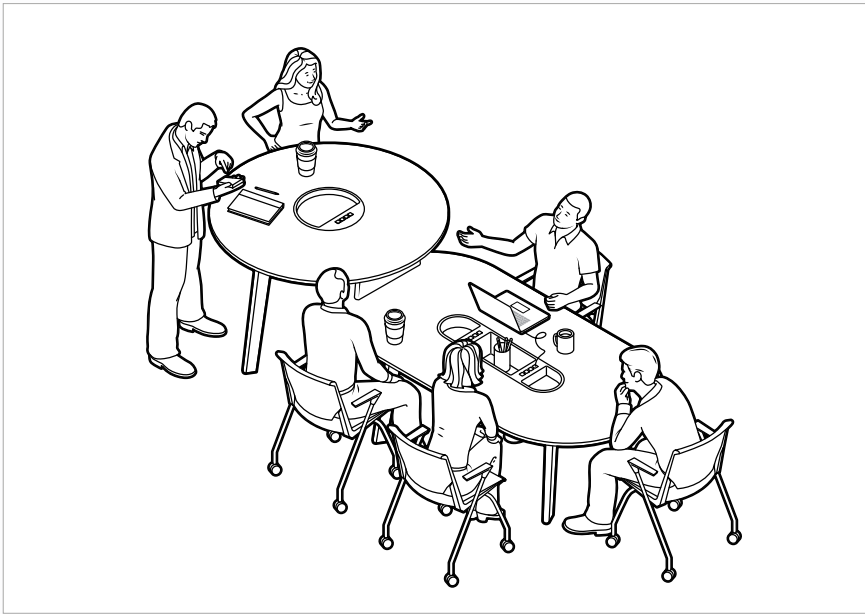

- Avoid filters or stroke styles that too clearly reveal the software features
- Based on a template, can be consistently applied by the Haworth interior design team

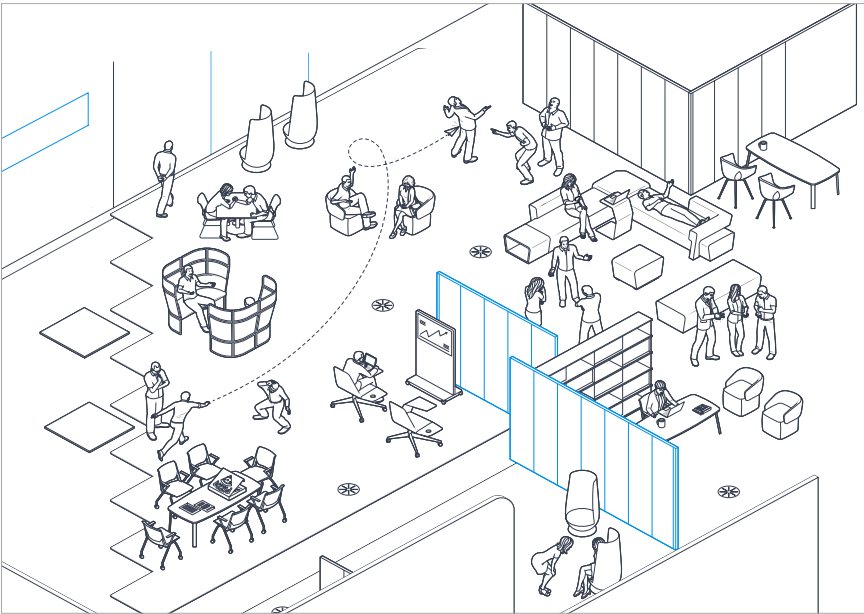

Textured sketch

Textured sketch

Line art sktech

Line art sktech

Narrative

Narrative illustration is a visual storytelling approach that incorporates human touch through collage and gestural lines, and taking on different styles, such as collage or line art. The combination of collage, hand-drawn, and a reduced color palette creates a narrative style that is unique to Haworth, aligning the brand with journalism style and communicating design leadership.

- For special events, skilled illustrators may be commissioned for a unique look and feel.

Collage: Mike McQuade

Collage: Cristiana Couceiro

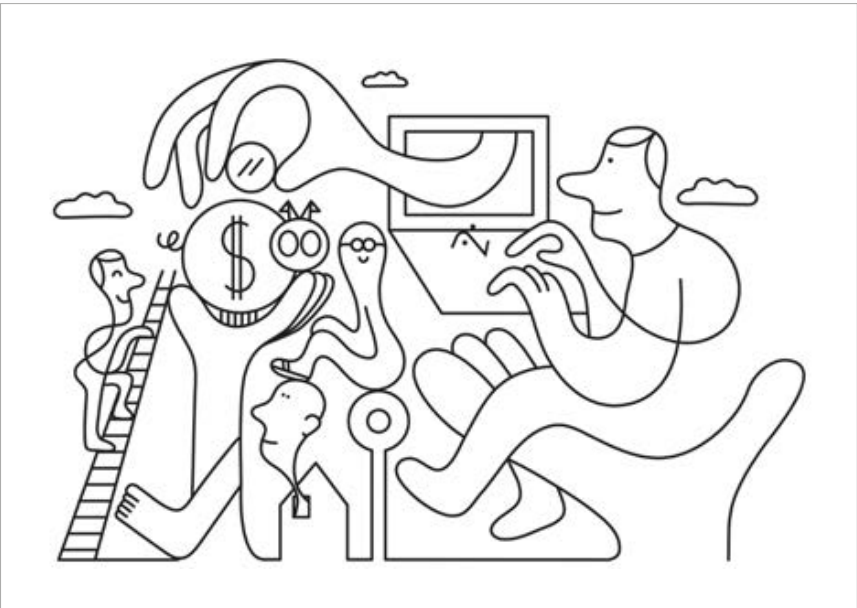

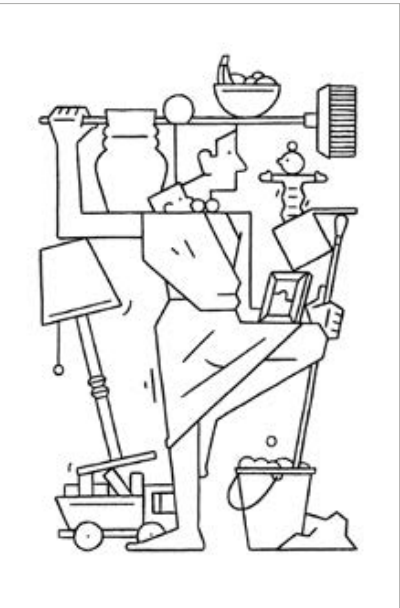

Collage: Matthew Hancock

Line art: Timo Kuilder

Line art: Lennard Kok

Line art: Jonathan Calugi

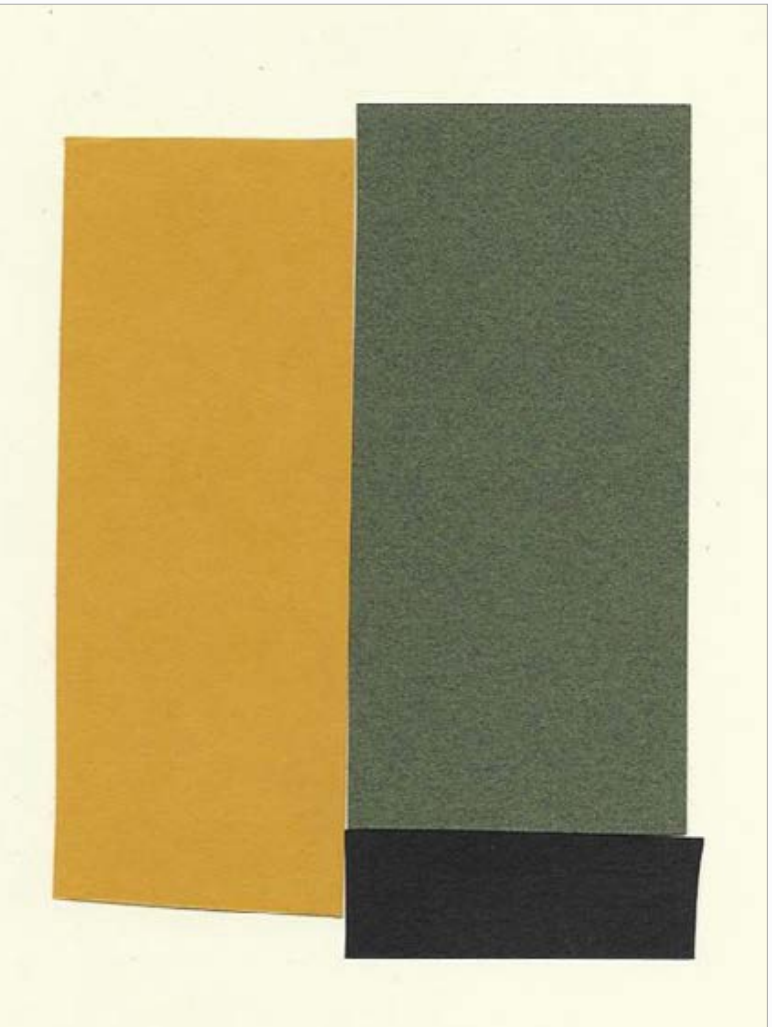

Abstract

This style conveys Haworth’s design and art sensitivity, employing human touch to create abstract compositions that incorporate color, shape, and textures. The preferred use of this illustration style is as a background. Use our existing color palette to reflect the brand identity and create consistency over time.

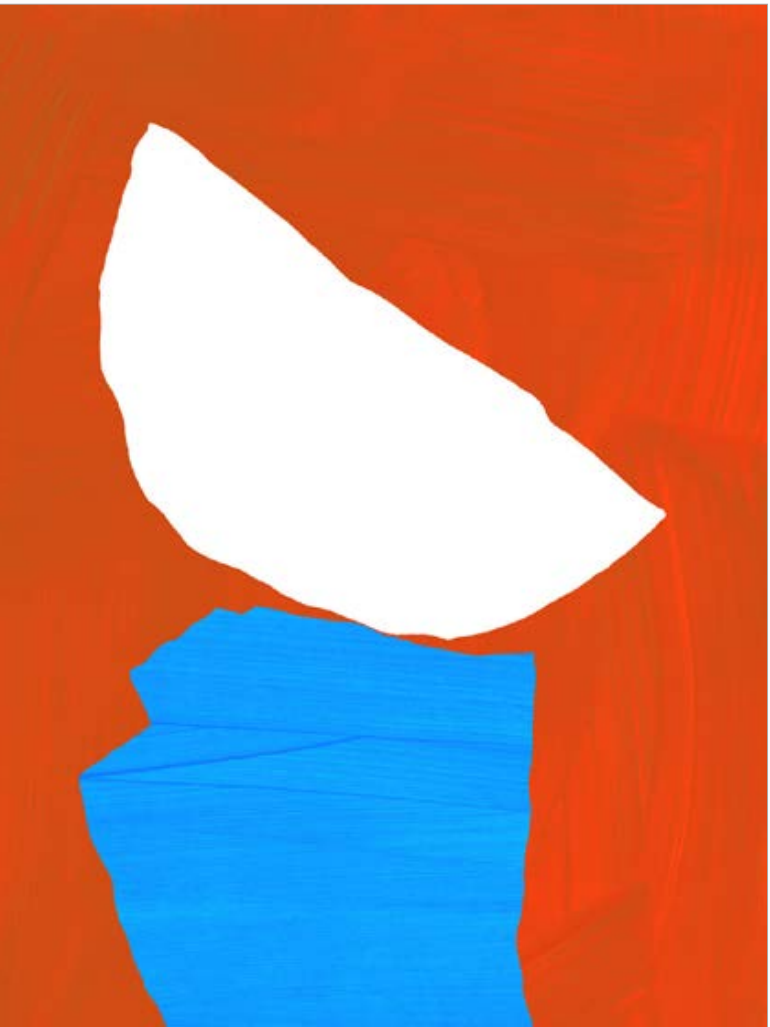

- Use for invites or more expressive applications when content related illustration or photography is not available.

Noémie Cédille

John Zabawa

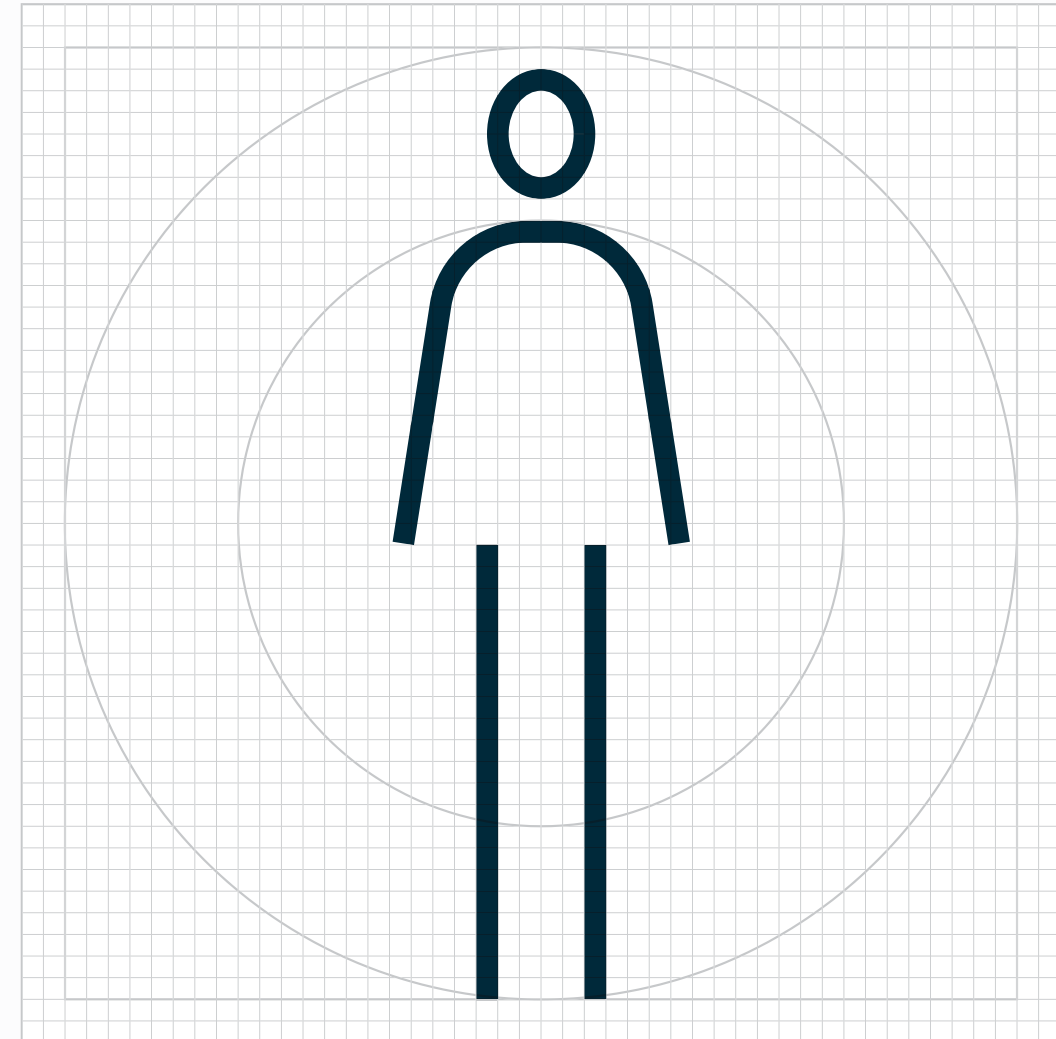

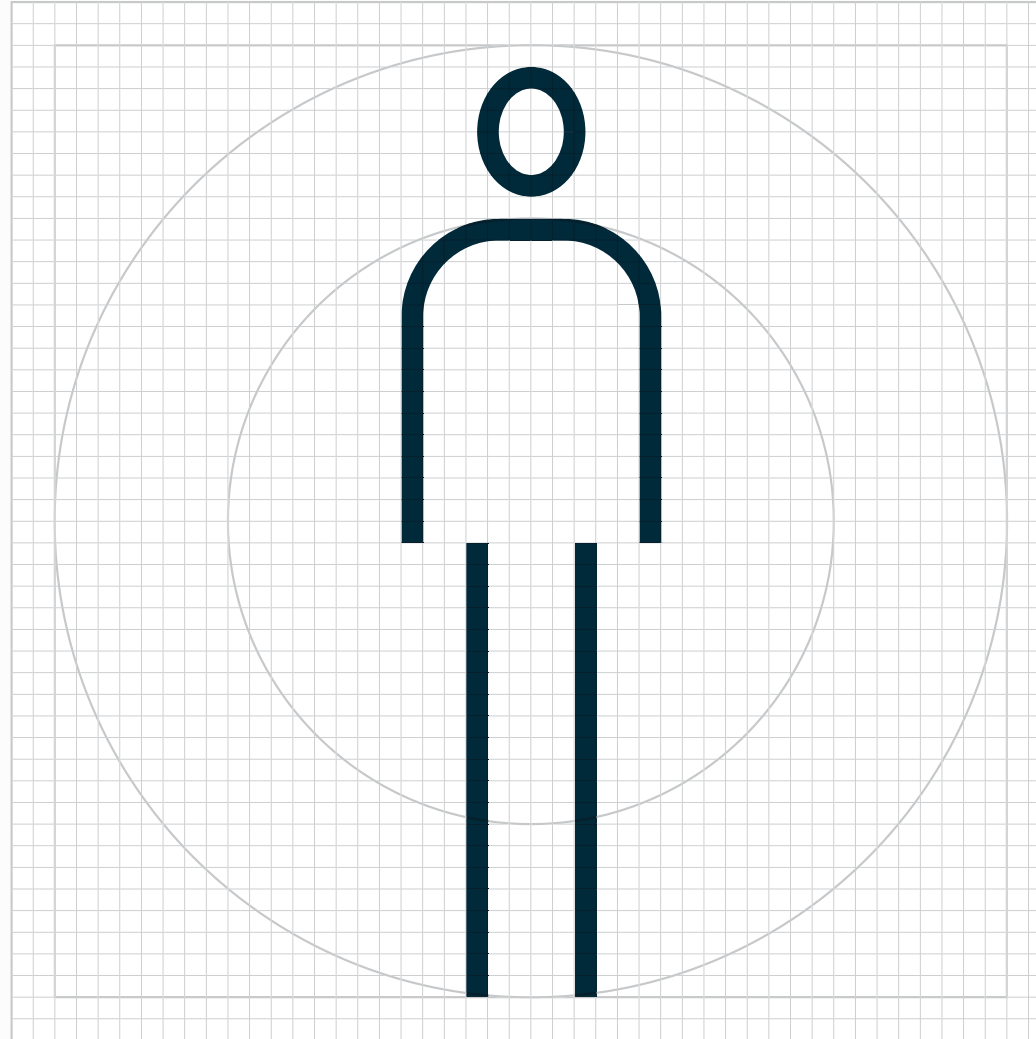

Ana Montiel

One Grid

Icons are conceptualizations of ideas and crystallize an idea in a single, abstract image. They can be used as supporting or introductory cues to content. They are used as a shorthand, whereas illustrations are used to explain a longer story or concepts.

Our icons follow a grid of 2.5 pt squares with all lines at 90° angles and curves created from perfect circles.

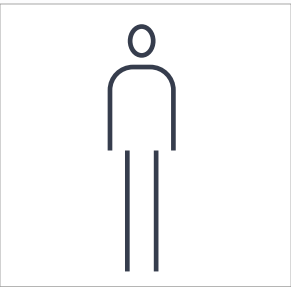

Refer to the [Icon_Guide.ai](#) for guidance on creating icons.

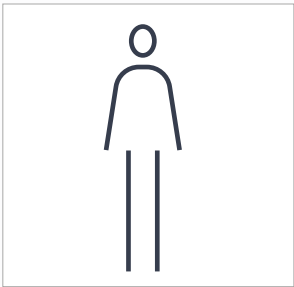

Icons for All Occasions

Line weights are consistent throughout all icons and increase proportionally when scaled.

Use our icon set exclusively. Any new icons will be developed from the same grid by Haworth Creative Studio.

Icons as Compositions

Icons come to life when used as supporting or introductory cues to content.

Colors and dotted lines can be used to add a layer of complexity and style to the icons.

Icons are Contextual

Consider the overall texture of the page (such as a white paper) when embedding icons within copy. The ideal line weight for the icon composition is in harmony with the other elements on the page.

Example of the white paper.

HAWORTH

Designing the Workplace for Innovation

5

Creativity Involves the Whole Brain

Creative cognition requires the executive control, default, and salience networks, involving the whole brain.¹⁶ The salience network filters external and internal stimuli, which is directly impacted by our external workplace environment and factors. Executive control is focus.

Salience Network: Your attention referee

The salience network tells us what should get our attention, by monitoring external and internal stimuli, passing information to the other networks, and determined how they are prioritized.¹⁷ Our salience network is designed to monitor stimuli. When something new or different occurs, it lets us know by bringing it into our awareness, and it can also be trained to monitor stimuli relevant to us. We have some control over our salience network by directing our attention (top-down), but other times, it directs attention for us (bottom-up). Whether a stimulus is desired depends on which cognitive mode you need to be in: convergent or divergent.

Executive Control Network: Your attention boss/taskminder

Without intentional focus, learning, problem-solving, and evaluating—important processes for the preparation and verification stages of creating new and useful ideas—are much more difficult. Focus is important to convergent thinking, and intentional focus engages the executive control network to help us complete tasks.¹⁸ Since we have limited cognitive capacities, if the tasks at hand demand more attention than we can manage, attention and performance declines,¹⁹ and can

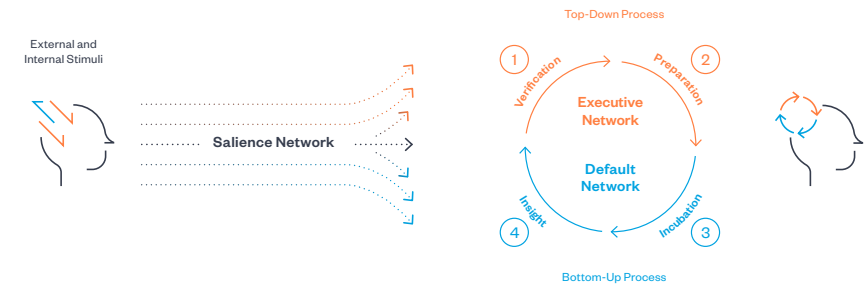

depend on other factors (difficult, duration, perceived costs) of the tasks involved.²⁰ At the onset of a focus task, our brain learns what's relevant and what to ignore²¹, and our focus gets more efficient the longer we control our attention. Without the ability to learn or refine ideas, there's no foundation or route for them to develop. Focus work is required for innovation.

Default Network: Your attention needs a break

How do our brains make connections between varied and unlikely concepts? By being inefficient, says Dr. Rex Jung in The New York Times: "...in the regions of the brain related to creativity, there appears to be lots of little side roads with interesting detours, and meandering little byways."²² Resting allows for divergent thinking, leading to idea generation through incubation and insight. Resting and routine downgrades the executive control network,²³ allowing imagination²⁴ to get more active. It takes what we've learned, integrating it with what we already know²⁵ in unique ways.

Why is being inefficient important to creative thought? "In a way, the [imagination network] is like a scout, ranging about for prospective futures."²⁶ Scouting is critical to connect what we know with what could be into a new idea. Cognition gets more spontaneous,²⁷ stumbling upon the desired connection responsible for the "ah-ha!" moment. With the salience network influencing how we perceive a workplace and its sensory environment, it impacts how we think and behave, including creative work habits.

From Stimuli to Thoughts

HAWORTH

Designing the Workplace for Innovation

7

about reaching peak performance. Researchers are starting to pull apart the conditions for this kind of peak creative performance.⁴⁴ For now, there's evidence that the right amount of "buzz" or activity⁴⁵ combined with an intent to let your mind wander⁴⁶ helps the ability to focus and engage imagination.⁴⁷

Smart Design for Workplace Creativity

Drawing from Haworth's workplace design and strategy expertise and considering scientific research on supporting convergent and divergent thinking, we've developed the following model for better understanding workplace creativity and innovation. In this model, we see, on one side, the need to protect focus work; on the other side, the need to encourage down-time, and the in-between for creative rhythm.

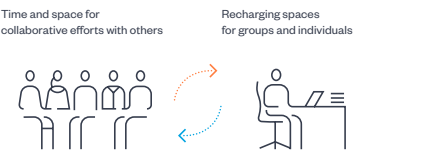

For creativity and innovation to flourish, employers should protect employees' ability to focus and encourage restorative behaviors in the workplace. Design considerations should address privacy, structure of activity, user control, and a variety of spaces, with the freedom to choose spaces as needed.⁴⁸

The Accumulation of Creative Ideas

For innovation to happen, we need others to build on our creative ideas and confirm their usefulness. Through knowledge sharing, the creative process applies to group efforts to create and innovate. What fosters creativity alone fosters creativity done together. Focus and rest are needed, but at times, we need to do these alone or together.

Knowledge Sharing: Creating and Innovating Together

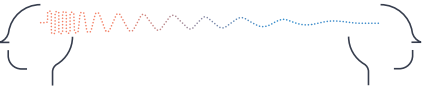

When groups are creative, individual cognitive creative processes become externalized, known as distributed cognition.⁴⁹ Preparation or group learning requires us to focus, broken up by incubation periods, and leading to insight when we socialize, along with periods of verification, requiring us to focus once again.

44. Beaty et al., 2016.	Marchetti, 2017.
45. Mehta, Zhu, and Cheema, 2012.	48. Nagy et al., 2016.
46. Golchert et al., 2016.	49. Sawyer, 2007.
47. Vannucci, Pelagatti, and	50. Sawyer, 2007.

Intense group focus work, or brainstorming, and seemingly inefficient processes help creative work habits. For example, dining or going to a performance together (socializing or engaging in off-task activities, respectively), results in unexpected questions, where meaning develops afterwards while we make sense of those questions in the verification stage.⁵⁰ Collectively, we are less successful with innovation if our engagement emphasis is solely on one creative activity.

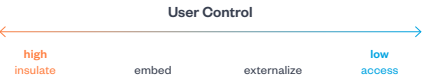

Designing Workplaces for Creativity: Focus, Creation, and Rest

Privacy is how easily outside disruptions happen. Focus requires some level of privacy from interruption and distraction. The more focus needed, the more privacy needed, while rest may vary in privacy needs.

Focus requires stability and predictable spaces, whereas restorative states are less dependent upon routines. Divergent thinking benefits from spontaneous activities and novel environments.

Focus requires more control over the environment so activities can be more personalized and predictable to preserve cognitive resources. Restorative behaviors require less control over the environment. For group restorative spaces, access to serendipitous interactions is most important.

51. Sailer, 2014.
52. Heslin, 2009.
53. wiruchnipawan, 2015.

Verbal Identity

Our verbal identity, or voice of the brand, is a strategic tool that guides the tone and style in which we write and say things.

Just like you get a sense for a brand through the way it looks, you can also understand a brand through the way it speaks. Brand voice is a **strategic tool that guides the style in which we write and say things**. When used correctly and consistently, our brand voice allows us to create a familiar connection to our audiences.

Our brand voice is informed by our organizational DNA and our brand strategy. Our voice should be **applied across everything we write**—from marketing communications, business development initiatives, to internal communications.

Our Voice is Confident, Considerate, & Insightful

We considered a number of verbal inputs to understand how we should sound when we speak. From those inputs, we created themes that could be simplified into a set of attributes that we could use in our tone of voice.

Attributes

Confident

Themes

Essential, Direct, Actionable, Expert, Rigorous

Verbal Exploration

- See what’s next
- Haworth is a global leader in workplace design
- Our award-winning Zody chair is the only chair patented for dual lumbar adjustment

Warm

Collaborative, Considerate, Human, Empathic, Intuitive

- We work with you to help your workplace culture evolve
- How can we help you?

Insightful

Creative, Dynamic, Visionary, Considered

- How can culture shape space?
- When art meets science
- Inspired by nature, made for collaboration

How To Do It

To understand how to write in a way that’s confident, considerate and insightful, we can translate our attributes into guiding principles and tactics to explore and avoid.

Attributes

Own Your Expertise: Confident

Assert a leadership role through speaking directly about our expertise and how it benefits the reader.

Execution

Do

- Speak with authority. Own our expertise, it’s what makes us distinctive.
- Convey progress and activity by writing in an active voice in the present tense and gerunds (we are, we have been, has developed, having worked on), as opposed to a pause (we will be) which sounds hesitant.
- Speak directly and edit out unnecessary words (articles and pronouns) whenever possible to make writing as brief as possible.
- Make our legacy important in how it benefits the reader.

Don’t Use

- Don’t be prescriptive or too formal.
- Don’t use ambiguous, empty marketing words.
- Don’t use language that feels sterile, default, or robotic.

Say It Simply: Warm

Be considerate. Step readers through information and ideas in ways that are straightforward and clear, so they understand what we have to offer.

Do

- Invite readers in by using casual, straightforward language. It makes us feel approachable and human.
- Anticipate your readers’ needs by thinking a step ahead to what they may want or need (i.e. To learn more...)
- Keep information easy to scan and digest by leading with the benefit, using short sentence structures, and leveraging bullets to prioritize important content.
- Speak in first person and second person to help readers see themselves in the stories we tell (i.e., We never felt so at home)

Don’t Use

- Don’t use third person language, it makes us feel distant. The goal is to be personal and professional at the same time, not impersonal and corporate.
- Avoiding using industry jargon, cliché sayings, and turns of phrase, which can come off as generic. Don’t be the stock photography version of language.

Showcase Deep Thinking: Insightful

Connect readers to larger ideas and inspirations to show depth of thought.

Do

- Connect what we’re doing to the larger world and different domains through posing questions and provocative statements (culture, design, engineering).
- Unpack ideas—use headlines and subheads to explain things instead of having one word or phrase in titles.
- Speak descriptively and precisely.

Don’t Use

- Don’t use arcane terminology or extremely scientific language. The point is to translate concepts that are complex and drawn from diverse areas into easy to understand concepts.

Examples in Use

Here’s how we use our tone of confident, considerate, and insightful across applications.

- Text length and choice inform design and hierarchy of content
- Tone varies by application and audience (eg. invite vs white paper), we are never universally all three but emphasize some more than others

What’s Your Organizational Culture?

How can we help you evolve your culture?

Workplace design shapes culture.

External facing (Digital PPT)

- Shorter is always better than longer
- Think about it from the perspective of the audience
- Consider if the presentation is leave behind or in person

Zody

Task Seating

Based on the science of human engineering, Zody® was the first chair patented and designed for fully adjustable personal comfort with an eye towards boardroom aesthetics and environmentally sensitive materials.

Zody is the only chair ever to be endorsed by the American Physical Therapy Association (APTA)

Product sheet

- Be as succinct as possible
- Explain product benefits

Design Miami

You’re invited to our private reception and dinner celebrating design with Patricia Urquiola and Giulio Cappellini.

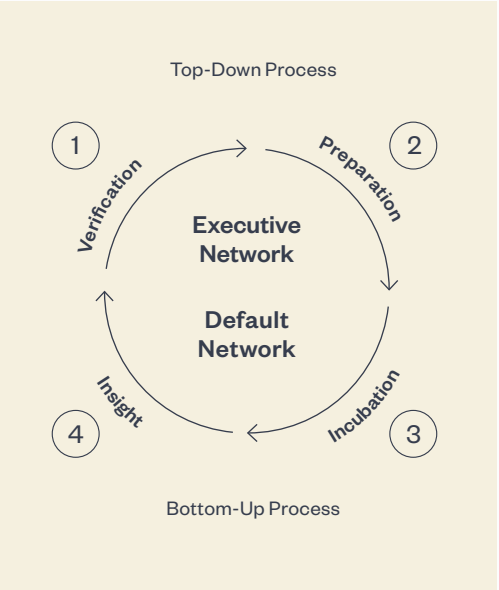

Thursday, December 6
8 pm Reception
8:30 pm Dinner

The Lido Deck at
The Standard Hotel
40 Island Ave,
Miami Beach, Florida

Event based

- Get to the point: guests will be receiving communications from many places
- Be welcoming

Designing spaces for focus, rest, and in-between activities builds work habits that lead to creativity.

Research (whitepaper)

- Summarize and draw attention to the most important points
- Reduce complex ideas and language
- Don’t be overly technical or high-minded

Come Together

Flexible and communal, social spaces inspire us.

LEARN MORE

Online (Module headlines, CTA, Spark)

- Have a clear call to action
- Be visual over verbal: Consider how images, diagrams, and illustrations can add to or replace writing

Corporate Materials

Now that all the design elements have been introduced, here's how logotypes, typography, and color work together in layouts.

External-facing applications communicate who we are as a company. They reflect the more corporate aspects of the brand, from logotype to color. These applications are produced and designed by the Haworth Creative Studio.

Identity

Overview

Internal-facing applications communicate who we are as a company. They reflect more corporate aspects of the brand, from logotype to color. These applications are produced and designed by the Haworth Creative Studio for internal use.

Most of these applications employ the standard size logo, with stated exceptions where the minimum size logo is appropriate.

Stationery emphasizes the Haworth logotype, set in a signature shade of red.

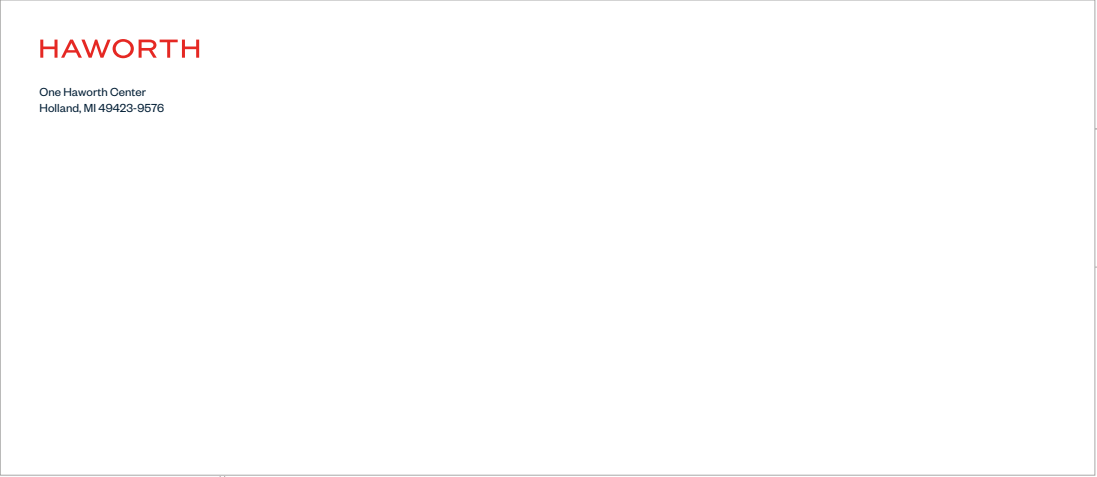

Shown at 60% scale.

Project Manager

One Haworth Center
Holland, MI 49423
USA

Dear Isadora,

Haworth is very excited and grateful for the opportunity to bid on PROJECT NAME Request for Proposal. We would very much like to work with you to find your most sustainable and beautiful workplace solutions. Our products are the most adaptable and durable products in the industry today. We design for the environment within an Integrated Palette™ of so that our products do more than just coordinate; they blend seamlessly both within and across all of our product lines.

Manufactured in ISO 9001 and 14001 certified facilities, both our products and our processes are intended to help sustain our world. As a result, Haworth workplace solutions affect your bottom line in a very positive way. And, we take care to ensure your customer experience is stellar by providing excellence in both project management and customer service. In fact, our policy is 100% customer satisfaction 100% of the time – and we're in the relationship for the long haul. We want you to be your workplace solutions partner for a very long time!

Along with our dealer, NAME, we will deliver the highest levels of products and services, including your LEED certification and small business involvement goals. We have the utmost confidence that our proposed solution both meets and exceeds your requirements and expectations. If you have any questions at any time regarding this response, please feel free to call or email me.

Sincerely,

Kurt Vander Schuur

PowerPoint Presentation

Use the standard color palette for all PowerPoint presentations.

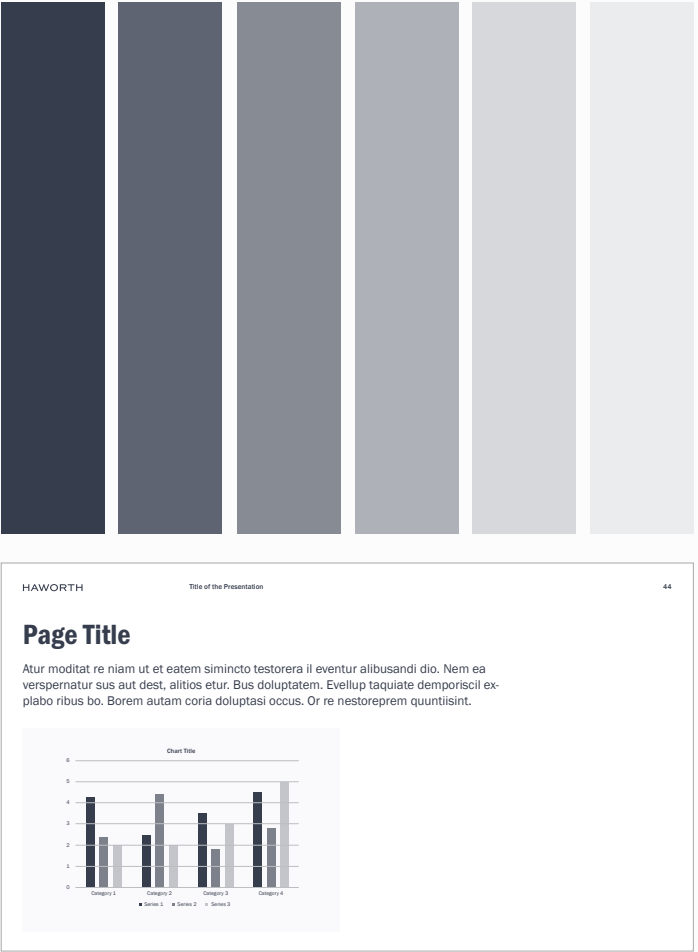

Standard

- Petrol Black and 1 Neutral as either a background or a text color
- Bright colors are only used in infographics
- Can be developed by all Members using PPT

Infographics: Standard

- Use tints of Petrol black
- Can be developed by all Members using PPT

Infographics: Expressive

- Expressive infographics are used in advanced presentations developed by Haworth Creative Studio
- Use the recommended color combinations and 1 instance of Petrol Black if necessary

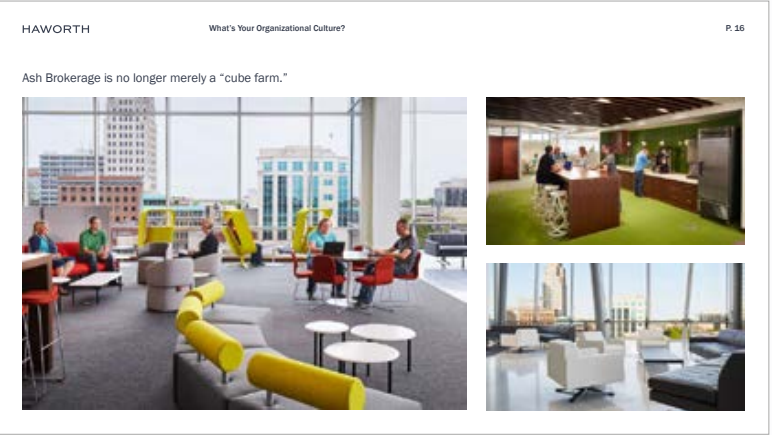

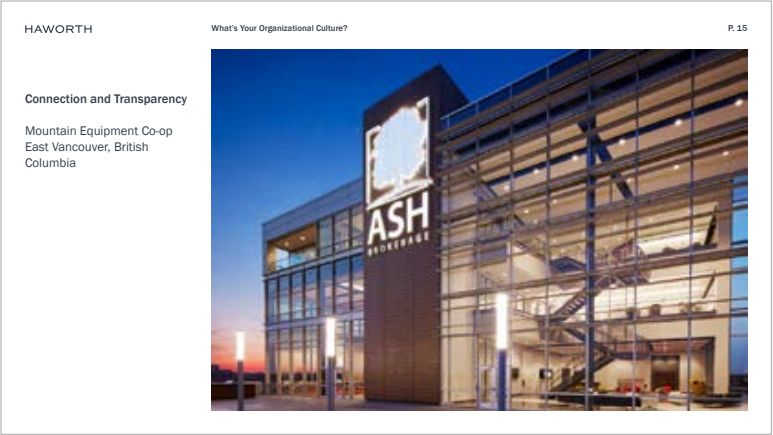

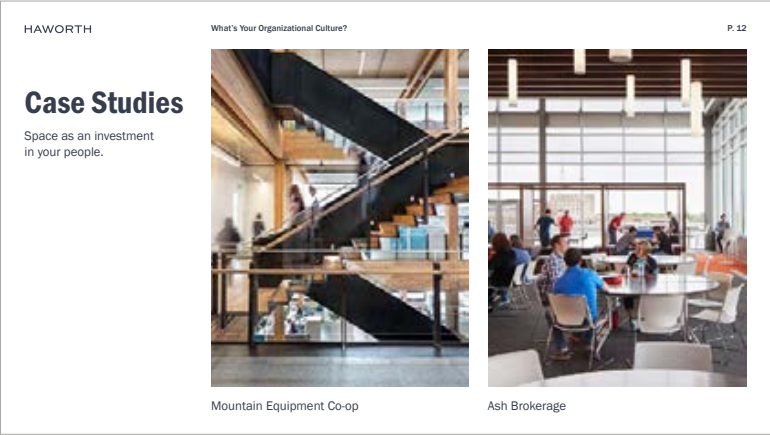

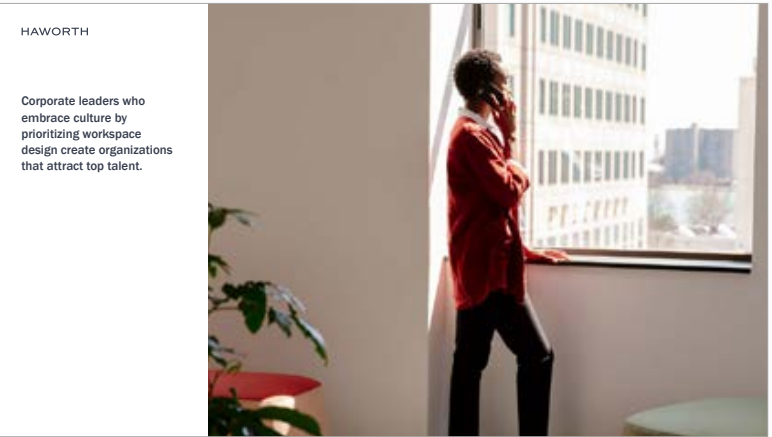

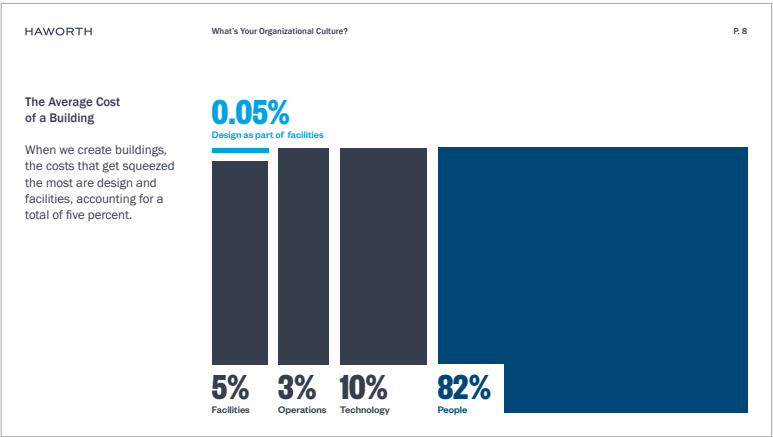

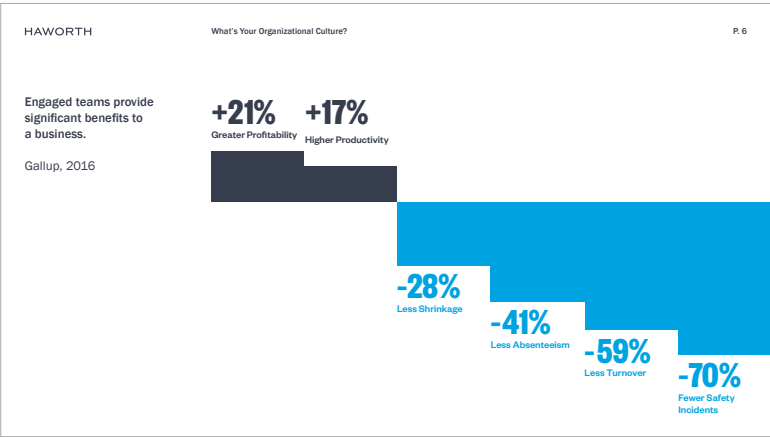

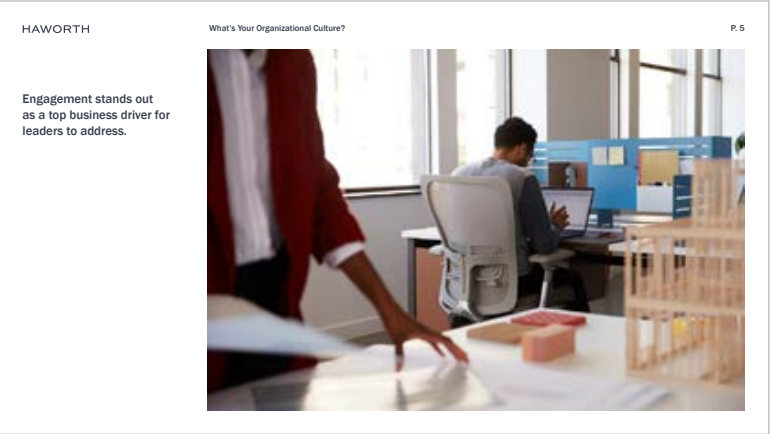

Digital Customer Presentation

The digital customer presentation is an important sales tool for introducing Haworth and demonstrating our thought leadership. Presentation sections and content are designed to be modular to allow for customization for different audiences and needs.

This presentation uses the same grid and type specifications as the standard PowerPoint presentation with the addition of the expressive color palette used exclusively for infographics.

Use the Digital_Presentation_Template.indd file provided when creating all advanced digital presentations.

These presentations are exclusively developed by Haworth Creative Studio.

Customer Story

Customer stories bring our expertise in workplace design to life in a visual way, and are used as a showcase for aspirational clients, projects, and photography.

Overview

Established in the 1970s, the Medicare End-Stage Renal Disease Program offers near universal coverage for every patient suffering from kidney failure. Who would have guessed its impact on healthcare today? One of the leaders in this field, DaVita provides renal population health management for over 25,000 patients a month. To be better situated for patients and access a talented pool of employees, mass transit, and affordable living, DaVita relocated its headquarters from El Segundo, California, to Denver, Colorado.

Specifications

- Stories: 14 floors
- Area: 350,000 sq. ft.
- Occupants: 800+

Challenge

Bolster well-being and convey DaVita's unique culture in a space that could flex for future growth.

Solution

Create a kit of integrated products and colorways that are easily reconfigured as DaVita's needs evolve.

Results

A model headquarters facility where people thrive—and DaVita can be poised for future expansion.

Creating a Culture of Well-Being

Challenge

Building Community For the Future

The name DaVita comes from an Italian phrase that means “giving life.” This concept underscores not only DaVita’s mission but also its culture. The DaVita Way is a passion for caring for fellow employees as much as patients. This community-focused, democratic approach takes everyone into consideration—which is why the new building needed to be so much more than an office space. Casa Vita would bring DaVita’s unique culture to life in an environment that promotes well-being for the people who work there.

At the same time, Casa Vita needed to provide flexibility—in the function of the space and its aesthetics—to change as they evolve and expands over time. Leadership challenged the design team to create a flexible footprint using a kit of parts from a single source.

Designing for Creativity

An inspiring community space fits into a corner location with full access to natural light and outdoor views.

Creating a Culture of Well-Being

“We aimed to encourage movement and interaction by offering alternate work settings through social spaces—including sprawling work lounges that dominate the Western façades and an unrivaled outdoor patio.”

Donna Acquilano
Founding Principal, Acquilano Leslie

- 1 Room with a View
Natural light and views outside are designed into every space of the building, from work areas to social spaces.
- 2 Restore Area
Throughout the building DaVita has provided ways for employees to relax and restore, from puzzles and board games to foosball and video games—ultimately contributing to a culture of well-being.
- 3 Lounge
Providing this casual setting, furnished with the comfortable GranTorino HB sofa, in the midst of formal office areas encourages people to take a break and restore.
- 4 Accessibility
This movable wall opens to expand the area and create a multi-use space when larger gatherings occur.

HAWORTH

Designing the Workplace for Innovation

6

The salience network, then, is the key for how a workplace (and all its external stimuli) impacts the way we think and behave, including our creative work habits. For the convergent and divergent thinking necessary to creativity, we should include design that helps the salience network prioritize creative work habits ranging from focus to rest.

Designing for Creative Rhythm: Focus, Rest, and In-Between

Because we need both focus and rest to foster convergent and divergent thinking for the creative process, workplace design needs to manage stimuli for the whole process. Whether a stimulus is relevant or not depends if you need to be in a convergent or divergent mode.

The Challenge for “Top-Down” Attention: Irrelevant Stimuli Sabotaging Focus

The challenge to focusing for convergent thinking begins when unwanted stimuli divert our focus, which can come in the form of emotion, arousal, or stress. For example, highly intense emotions, whether positive or negative, divert efforts to intentionally focus.²⁸ In a Haworth Human Performance Lab experiment, when arousal or stress was too high, performance on time sensitive and high-focus tasks was poor.²⁸

Top-down attention requires interest.³⁰ A good motivator for focus work is achievable yet challenging tasks³¹, that create the sweet spot of interest, engagement, or arousal. Managing stimuli that doesn’t sabotage our focus is challenging, so we look to environments that can create the right creative habits with spaces for focus, rest, and the in-between.

The Advantage of “Bottom-Up” Attention: Stimuli Sparking New Ideas

Boredom isn’t always necessarily bad. When our minds wander, our imagination network—fed by varied and novel stimuli—can kick in and do some work.³² Variety of stimuli serves a purpose—cueing the resting brain for imaginative thinking. By soaking in surrounding stimuli (“bottom-up” attention), our imagination network is priming us to make unique connections across concepts we already know.

Oftentimes, when we want to clear our head, we seek out a different space and or activity, daydream, or do something

routine,³³ letting our brains noodle on potential ideas.³⁴ However, many ideas have come to light when you were doing something routine, like walking to work or taking a shower?³⁵ These kinds of routine activities are ones where you go through the motions with just enough awareness, with little recollection of how exactly you got there.³⁵ On autopilot, the imagination network gets tinkering done, sometimes arriving at that flash of insight. Since our brains can do so much good stuff when we’re relaxed, we should encourage and protect restorative behaviors at work to help incubation and insight.

Designing spaces for focus, rest, and in-between activities builds creative work habits.

Creative Rhythm and Peak Performance

We need focus and rest for creative cognition, but the optimal creative rhythm of switching between these modes depends on many factors: ability to focus, rest, existing and required knowledge, and where we are in the creative process.

The rhythm between focusing and resting can be slower, with longer periods in each state. Sleeping each night, for example, provides a longer resting period to cognitively benefit divergent thinking.³⁶ A study conducted by DeskTime revealed that the top 10 percent of productive employees took a 15-minute break after working for about an hour.³⁷ In a state of creative peak performance, this creative rhythm can be quite fast, to the point we can’t tell which mode we’re in. We’re absorbing information, creating ideas, and refining all at once, effortlessly. Here we have optimal focus with the least amount effort (or cognitive load), freeing up resources to control our attention for other kinds of cognition — past experiences, preparation work,³⁸ moral reasoning, working memory,³⁹ and spontaneous thought⁴⁰ from the imagination/ default network⁴¹ for whatever task is being performed. Now, the whole brain is involved so that convergent and divergent thoughts happen simultaneously,⁴² with executive control and default networks cooperating instead of competing.⁴³ We are in the “in-between” space between high focus and rest. In this state, we lose a sense of time; hours pass like they are minutes. However, if efforts to focus are sabotaged up front (or you are exhausted or the challenge is either too much or too little), you can forget

HAWORTH

Designing the Workplace for Innovation

4

Developing and Practioing Creativity

There are four stages of cognition in the creative process: preparation, incubation, insight, and verification.⁸ Without spending time in all of these stages, creative ideas don't happen. By developing expertise, following the right work habits, and knowing how to combine ideas and select good ones, we can get better at it.¹⁰

Unfortunately, our workplaces don't provide what we need to support the right work habits. The executive control, default, salience neural networks are most important to creative cognition. Knowing how these networks work together helps us understand the right work habits and how to design for them in the workplace.

People with deep knowledge of various areas of interest have more to draw upon for creative ideas. Curiosity and openness to new experiences is closely tied to creative outcomes.¹⁵ Their deep knowledge then provides more material from which to make new connections.¹⁶

“Inspiration prefers the prepared mind.”

Dr. Scott E. Kaufman and Carolyn Gregoire

What Kinds of Thinking are Needed for Creativity?

1

Verification

Evaluating and elaborating the creative idea until fruition or learning, which becomes knowledge essential for preparation activities.

2

Preparation

Gathering information from sensory input to developing expertise in a knowledge area.

3

Insight

Recognizing a novel way that information can be understood, the “ah-ha” moment.

4

Incubation

Allowing information to be integrated with past and different areas of knowledge.⁹

Executive Control Network

Powers goal-directed, narrowing, or convergent thinking that is necessary for completing tasks and making decisions. Much of preparation and verification involve this network and convergent thinking.¹²

Saliense Network

Acts as a gatekeeper for internal and external stimuli for convergent and divergent thinking.¹¹

Default Network

Facilitates spontaneous, expansive, or divergent thinking necessary for making new connections across concepts and generating new ideas. Much of incubation and insight involve this network and divergent thinking.¹⁴

8. Sawyer, 2012; Kaufman and Gregoire, 2015.

9. Sawyer, 2012.

10. Menon, 2015.

11. Jung et al., 2013.

 John Scott LEED AP, NCIDQ, holds a B.F.A. in Interior Design with an emphasis on Interior Architecture. He has extensive workplace design experience, specializing workplace strategy, design development, and change management. As a knowledge leader for Haworth's Workplace Strategy team, John translates workplace research into applied design. Through deep insights into clients' vision, goals, and objectives, he helps organizations understand linkages between design and business performance. John facilitates exploration of how new ways of working impact cultural and organizational change, leading to solutions that best serve an organization's strategic needs. Product Sheet

The product sheet complements the website in a digital download that shows product in use with a succinct summary of product features. The flexibility of the modular grid system accommodates a breadth of products.

HAWORTH

Task Seating

Zody

Front

HAWORTH

Zody Task Seating

Based on the science of human engineering, Zody® was the first chair patented and designed for fully-adjustable personal comfort-with an eye towards boardroom aesthetics and environmentally sensitive materials.

Features

- Zody is the only chair ever to be endorsed by the American Physical Therapy Association (APTA)
- PAL® back system for asymmetric lumbar support provides passive pelvic support to maintain the spine's natural curvature
- Adjustable 4D armrests

Active Components Upper Storage

Front

HAWORTH

Active Components Upper Storage Workspaces

Active Components Upper Storage® offers a variety of adaptable elements, making open floorplans and smaller workspaces more personal, comfortable, and efficient.

Features

- Personal Divider with Drawer: Connects us to others through out-of-the-way details, while allowing for personal space through the partition and storage options.
- Nook: Increases visual privacy, includes organizational elements, and provides USB power access.

Invite (Printed)

Printed invites should capture the audience’s attention through color, imagery, and headlines.

Shown at 80% scale.

Text and Color Block
Best if you need to make something quickly or don’t have appropriate photography or illustration assets

Half Image
Use imagery that reads well in landscape format

Full Bleed Image
Make sure text is legible with image background. Use imagery that reads well in portrait format.

Invite (Printed)

Premium Products

When possible, choose products that...

- are meaningful and memorable
- create a personal connection with the receiver
- communicate design and beauty

Corporate

- Logotype applied in Bright Red

Neutral

- Logotype applied in a way that is materially integrated (embossing, embroidery)

Expressive

- Logotype applied as a surface treatment (printed, vinyl, etc)

Mockups are for demonstration purposes only and are not product specific.

Neutral: logotype in black or tone on tone

Neutral: logotype applied to the material

Neutral: logotype applied to the material

Corporate: logotype and messaging on tag

Expressive: logotype and brand colors applied to the material

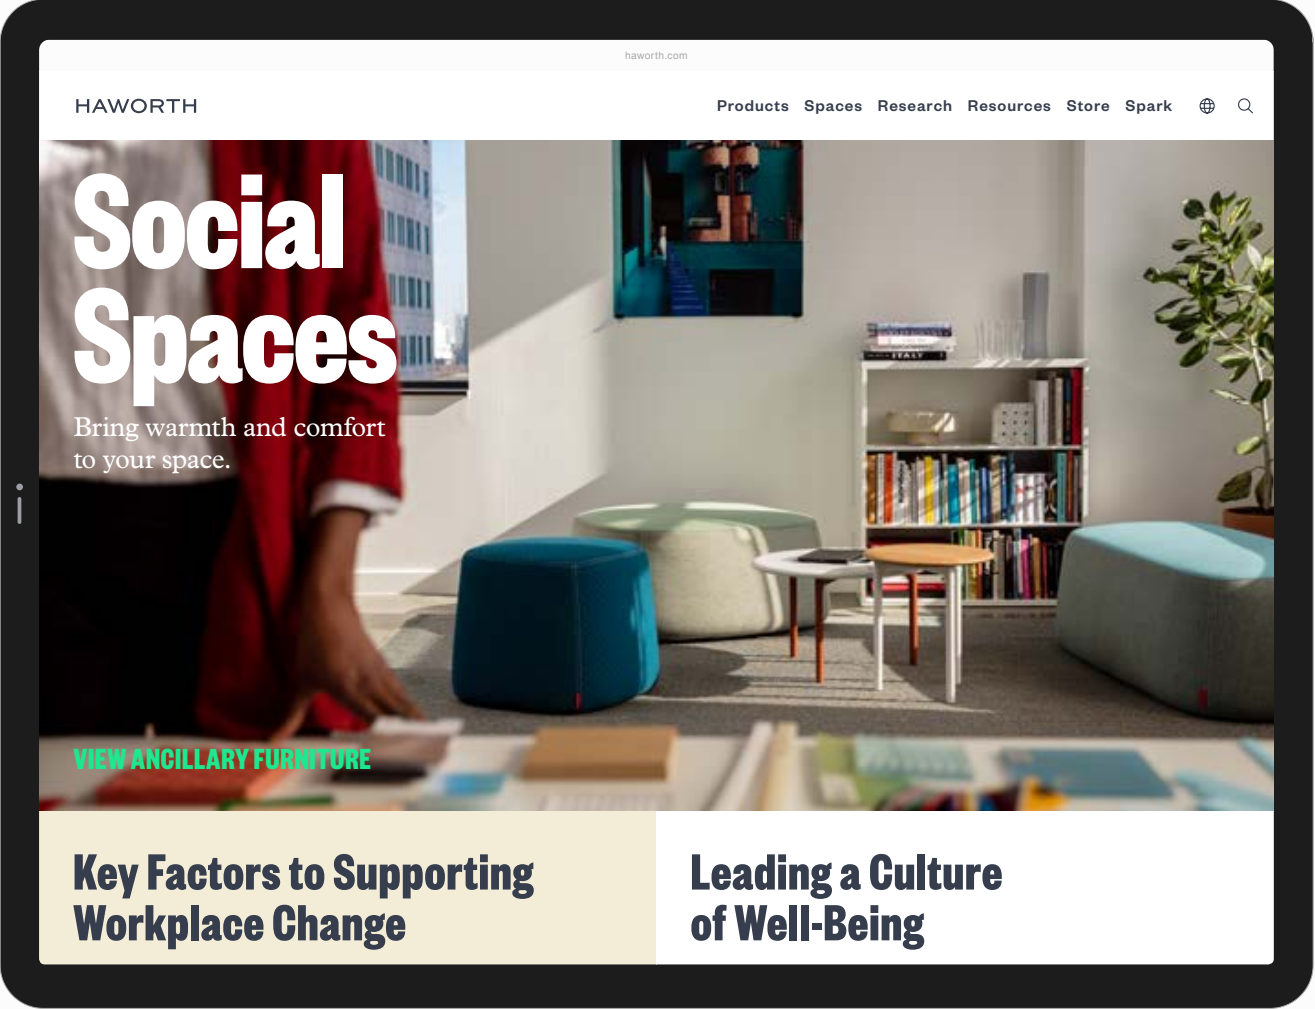

Expressive: logotype and illustration applied to the material

Digital

* Not final design.
For demonstration purposes only.

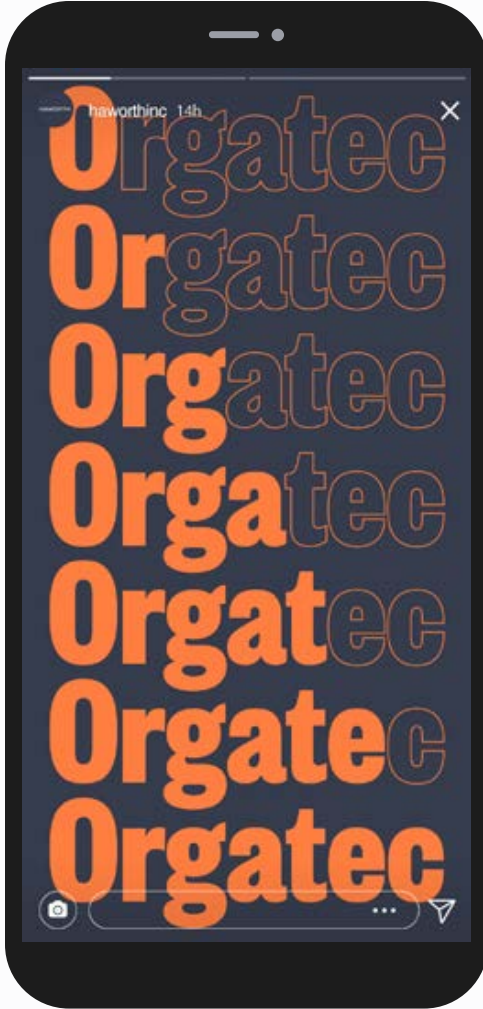

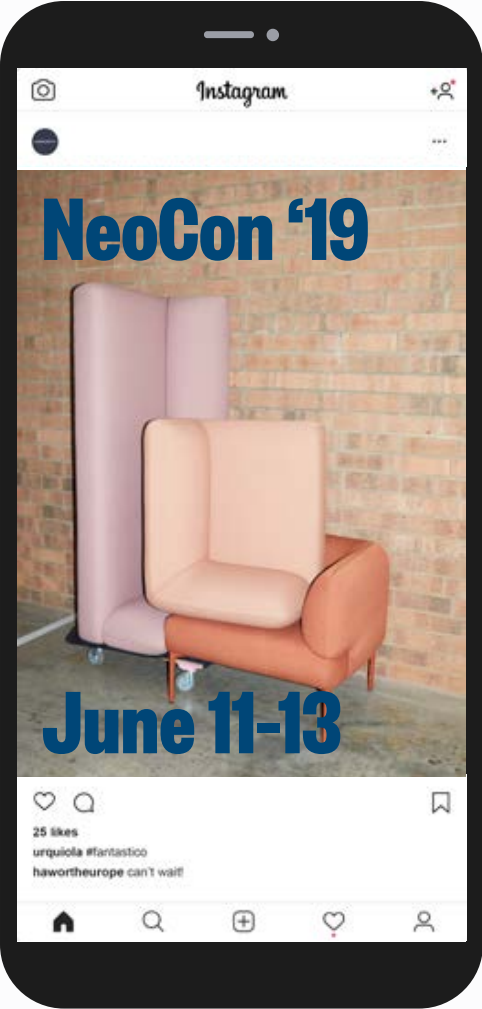

Homepage as Central Portal for Brand Stories

We use photography, videos, and color to convey an elevated sense of Design Intelligence.

Social Media is Expressive

On social media, people have less time to read and there is much more competing messaging. Social media applications should be more immediate and expressive in color, photography, and illustration.

Our brand identity is a work in progress, and we're constantly refining and improving.
